

GRAFT-COPOLYMERIZATION OF STARCH WITH VINYL MONOMERS

by

OM PAL SINGH

Department of Chemistry

Submitted

in fulfilment of the requirements of the degree of

DOCTOR OF PHILOSOPHY

TO THE

INDIAN INSTITUTE OF TECHNOLOGY, DELHI

April, 1985

DEDICATION

"Dedicated to all the people so devoted
to a particular sequence of informations
and knowledge."

CERTIFICATE

This is to certify that the thesis entitled
GRAFT-COPOLYMERIZATION OF STARCH WITH VINYL MONOMERS"
being submitted by Mr. Om Pal Singh, to Indian Institute
of Technology for the award of the degree of Doctor of
Philosophy in the Department of Chemistry, is a record
of bonafide research work carried out by him. He has
fulfilled the requirements for the submission of the
thesis. The results contained in this thesis have not
been submitted, in part or in full, to any other
University or Institute for the award of any degree or
diploma.

ACKNOWLEDGEMENTS

I wish to extend my gratitude to all those aided in the completion of this dissertation.

I offer my sincerest thanks to Dr. N.K. Sandle, Associate Professor, Department of Chemistry and Prof.(Mrs.) I.K. Varma, Head, Centre for Materials Science and Technology for their guidance and cooperation rather for a longer period. The former is particularly thanked for his understanding and cooperation at the critical stage, which could make it possible to complete this work.

I wish to express my special thanks to all the teaching and technical staff of Chemistry Department, Centre for Materials Science & Technology and Textile Technology Department for their invaluable assistance; they rendered to me during the duration of this work.

I also wish to acknowledge my special thanks to my colleagues and friends, especially my seniors Drs. B.S. Rao, K.R. Murthy, M.S. Choudhary and R.G. Raj who generally extended their help and cooperation whenever it was needed and virtually had similar time of high and low spirit.

The authorities of Indian Institute of Technology, Delhi and Council of Scientific and Industrial Research, India are acknowledged for the award of research fellowships for carrying out this work.

Finally, but not the least, Mr. Rajesh Arora and Mr. K. Giri are thanked for neat and accurate typing of the thesis and so are thanked Mr. K.G. Padam and Mr. K.C. Saxena for the accurate tracing of the figures.

Om Pal Singh

LIST OF FIGURES

CHAPTER I.	GENERAL INTRODUCTION AND LITERATURE REVIEW	
1.1	Introduction	1
1.2	Structure of starch	3
1.2.1	Chemical Structure of starch	3
1.2.2	Morphology of starch	7
1.3	Graft-copolymerization of starch	9
1.3.1	Free radical graft-copolymerization	9
	(a) Chemical methods	10
	(b) Irradiation methods	13
1.3.2	Anionic graft-copolymerization	14
1.3.3	Evidence of grafting	15
1.4	Properties of graft-copolymers of starch	17
1.5	Potential applications of graft-copolymers of starch	21
1.6	Scope of the present investigations	37
CHAPTER II.	GRAFT-COPOLYMERIZATION OF STARCH WITH VINYL MONOMERS	
2.1	Introduction	39
2.2	Experimental	40
2.2.1	Reagents and their purification	40
2.2.2.1	Grafting of vinyl monomers onto starch	41

2.2.2.2	Separation of homopolymers from graft-copolymers	42
2.2.2.3	Nitrogen estimation	43
2.2.2.4	Homopolymerization of acrylamide	44
2.2.2.5	Kinetics of acrylamide polymerization	45
2.3	Results and Discussions	45
2.3.1	Grafting of vinyl monomers onto starch	45
2.3.1.1	Grafting of acrylamide onto starch	45
2.3.1.2	Grafting of alkyl acrylates onto starch	47
2.3.1.3	Grafting of HEMA, EDMA and AN onto starch	49
2.3.1.4	Effect of nature of monomer on grafting	51
2.3.2	Effect of variation of reaction parameters on grafting of acrylamide onto starch	54
2.3.2.1	Homopolymerization of acrylamide	54
2.3.2.2	Graft-copolymerization of acrylamide onto starch	55
2.3.2.3	Kinetics of acrylamide polymerization in presence of starch	64
CHAPTER III. CHARACTERIZATION OF GRAFT-COPOLYMERS OF STARCH		
3.1	Introduction	67
3.1.1	IR spectroscopy	67
3.1.2	Molecular weight determination	68
3.1.3	Density measurements	69
3.2	Experimental	71
3.2.1	IR spectroscopy	71
3.2.2 (a)	Degradation of starch portion of the copolymers.	71

3.2.2(b)	Determination of viscosity	72
3.2.3	Density measurements	74
3.3	Results and Discussions.	75
3.3.1	Infrared spectra of starch-graft-copolymers	75
3.3.2	Viscosity studies of graft-copolymers	80
3.3.2.1	Intrinsic viscosity of PAM samples	80
3.3.2.2	Viscosity studies of grafted alkyl acrylate moieties	82
3.3.3	Effect of grafting of vinyl monomers on density of starch	87
CHAPTER IV.	THERMAL BEHAVIOR OF GRAFT-COPOLYMERS	
4.1	Introduction	89
4.2	Experimental	91
4.3	Results and Discussions	95
4.3.1	Effect of the nature of monomer on the thermal behavior of starch-graft-copolymers	95
4.3.2	Thermal behavior of starch-graft-copolymer with polyacrylamide	102
4.3.3	Thermal behavior of starch-graft-copolymers with alkyl acrylates	107
4.3.4	Thermal behavior of starch-graft-copolymers of starch with AN, HEMA and EDMA	113
CHAPTER V.	MECHANICAL PROPERTIES, MORPHOLOGY AND ENZYMATIC DEGRADATION OF STARCH-GRAFT-COPOLYMERS	
5.1	Introduction	122

5.2	Experimental	124
5.2.1	Mechanical properties	124
5.2.2	Morphology of starch-g-polyacrylamide copolymers.	127
5.2.3	Enzymatic degradation of starch-g-polyacrylamide copolymers.	127
5.3	Results and Discussions.	127
5.3.1	Mechanical properties of starch-g-polyacrylamide copolymers	127
5.3.2	Mechanical properties of starch-g-polymethyl acrylate copolymers	130
5.3.3	Mechanical properties of starch-g-polyethyl acrylate copolymers.	132
5.3.4	Mechanical properties of starch-g-poly(η -butyl acrylate) copolymers	135
5.3.5	Effect of polyacrylamide grafting on morphology of starch	137
5.3.6	Action of α -amylase against starch-g-polyacrylamide copolymers	138
CHAPTER VI.	GENERAL DISCUSSIONS AND SUMMARY	141
6.1	General discussions and summary	141
6.2	Suggestions for the future work	153
