CERTIFICATE

This is to certify that the Thesis entitled "Electrical, Magnetic, Microstructural Properties and Mössbauer Studies of Hot Pressed Mn-Zn-Ni and Mn-Zn-Co Ferrites" being submitted by Mr. Vijay Kumar Babbar to the Department of Physics, Indian Institute of Technology, Delhi for the award of the degree of 'Doctor of Philosophy' is a record of bonafide work carried out by him. He has worked under our supervision and guidance and has fulfilled the requirement for the submission of this Thesis, which in our opinion has reached the requisite standard.

The results contained in this work have not been submitted, in part or full, to any other University or Institute for the award of any degree or diploma.

Prof. R.K. Puri
Department of Physics,
I.I.T. Delhi.

Prof. R.G. Mendiratta
Head, Department of Physics,
I.I.T. Delhi.

ACKNOWLEDGEMENTS

I express my sincere gratitude to Prof. R.K. Puri and Prof. R.G. Mendiratta for their immense interest, invaluable guidance and constant encouragement throughout the tenure of this work. I am highly grateful to Dr. Pran Kishan of Solid State Physics Laboratory, New Delhi for providing some of the experimental facilities. I acknowledge the financial support given by the Department of Science and Technology, Delhi for undertaking this work.

I extend my special thanks to Ms. Reshmi Mitra and Dr.(Mrs.) Vijayalakshmi E. Satyen for generously giving their time and help at every stage of this work. My thanks are due to Dr. T.K. Bansal of M'ossbauer Research Group, I.I.T. Delhi and Dr. C.P. Rana of S.S.P.L., New Delhi, for their cooperation in some parts of the present work. I am also thankful to all of my friends and colleagues especially Atmaram Lakshman, V.Mishra, B.M. Gupta, Ravi Mittal, Rama Saxena, A. Jyothi and C.P. Shobhanath for helping me in different ways. Finally, I am personally grateful to all the members of my family including my fiancée, Ms. Gulshan Sahdev, for their constant inspiration and moral support.

(VIJAY KUMAR BABBAR)

ACKNOWLEDGEMENTS	(i)
CHAPTER I INTRODUCTION AND AIM	
1.1 Introduction	1
1.2 Structure of Ferrites	2
1.3 Effect of Additives	6
1.4 Normal and Hot Pressed Ferrites	8
1.5 Aim of the Present Work	10
REFERENCES	16
CHAPTER II THEORETICAL BACKGROUND	
2.1 Introduction	20
2.2 Theory of Hot Pressing	20
2.2.1 Sintering Mechanisms	20
2.2.2 Sintering Parameters	22
2.3 Electrical Properties	25
2.3.1 D.C. Resistivity	25
2.3.2 Dielectric Constant and Loss Factor	27
2.4 Magnetic Properties	31
2.4.1 Saturation Magnetization	31
2.4.2 Curie Temperature	34
2.4.3 Magnetocrystalline Anisotropy	35
2.4.4 Initial Permeability	36
2.4.5 Hysteresis Loops	42

2.5 Mössbauer Studies	44
2.5.1 Isomer Shift	46
2.5.2 Electric Quadrupole Interaction	48
2.5.3 Magnetic Hyperfine Interaction	51
2.5.4 Relaxation Effects	56
2.5.5 Line Width and Line Shape	60
REFERENCES	62
CHAPTER III EXPERIMENTAL DETAILS	
3.1 Introduction	69
3.2 Methodology of Sample Preparation	69
3.2.1 Composition	69
3.2.2 Methods of Preparation	70
3.2.2.1 Normal Ceramic Method	71
3.2.2.2 Uniaxial Hot Pressing	71
3.3 Microstructural Studies	77
3.3.1 X-ray Diffraction Analysis	77
3.3.2 Density and Porosity	78
3.3.3 Scanning Electron Micrographs	78
3.3.4 Hardness	79
3.4 Electrical and Magnetic Properties	80
3.4.1 D.C. Resistivity	80
3.4.2 Dielectric Constant and Loss Factor	81
3.4.3 Saturation Magnetization	82
3.4.4 Curie Temperature	85

3.4.5 Initial Permeability	85
3.4.6 Hysteresis Loops	86
3.5 Mossbauer Studies	87
REFERENCES	90
CHAPTER IV MICROSTRUCTURAL PROPERTIES	
4.1 Introduction	91
4.2 X-ray Diffraction	91
4.2.1 Lattice Constant	93
4.2.2 X-ray Density	95
4.3 Experimental Density and Porosity	95
4.4 Scanning Electron Micrographs	98
4.5 Hardness	101
REFERENCES	102
CHAPTER V ELECTRICAL AND MAGNETIC PROPERTIES	
5.1 Introduction	103
5.2 Electrical and Magnetic Properties	103
5.2.1 D.C. Resistivity	103
5.2.2 Dielectric Constant and Loss Factor	108
5.2.3 Saturation Magnetization	126
5.2.4 Curie Temperature	132
5.2.5 Initial Permeability	135
5.2.6 Hysteresis Loops	146
