1987

यह अनुसंधान कार्य समर्पित है
क्षेत्रीय कारीगर पंचायत, बिशुनपुर से जुड़े उन सभी साथियों को
जिनकी सक्रिय सहभागिता के बिना यह कार्य असम्भव था।

* * * * *

This research work is

dedicated to

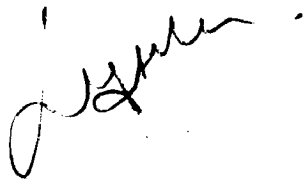

My comrades of Karigar Panchayat, Bishunpur;

this task was impossible without their active participation.

Mahesh Sharma

CERTIFICATE

This is to certify that the thesis entitled, "TO DEVELOP METHODOLOGY OF APPROPRIATE TECHNOLOGICAL INPUTS TO GENERATE EMPLOYMENT IN A TRIBAL REGION", submitted by Mr. Mahesh Sharma has been prepared under my supervision in conformity with the rules and regulations of Indian Institute of Technology, Delhi. The research report and results presented in this thesis have not been submitted for any degree in any other University/Institution.

Dr. Rajendra Prasad

**Senior Scientific Officer-I
Centre for Rural Development
and Appropriate Technology,
Indian Institute of Technology,
NEW DELHI - 110 016.**

ACKNOWLEDGEMENTS

It is my great pleasure and privilege to express profound gratitude to Dr. Rajendra Prasad, my research - supervisor at IIT Delhi, for his invaluable guidance, constructive criticism, stimulating discussions and constant inspiration offered at each and every stage of this work. He was much more than a formal research-guide to me.

Prof. (Mrs.) P.Vasudevan, Head of the Centre for RD&AT, extended all possible help and took keen interest in the work carried out at Bishunpur. It is only because of her involvement and encouragement, and that of Late Prof. S.V. Patwardhan, that this unconventional research work could be completed at IIT Delhi. Prof. Patwardhan, former Head of the Centre for RD&AT, provided all sort of help and guidance at critical junctures, as a result of which this work could take the present shape.

I have been fortunate to have got the fullest cooperation from all the faculty-members at the Centre and I express my sincere thanks to Dr. R.C. Maheshwari, Dr. (Mrs) Mira Madan, Sri V.P.S. Sorayan, Dr. Santosh Satya, Dr. Jagpal Singh and others in the Centre. Dr. Jagpal Singh provided me scope for very useful discussions on certain key issues related to this work.

My friends Ajit Kumar, Hiralal Yadav, Man Mohan, Shyam Rudra Pathak, Amarendra, Sachin Mittal, Ram Vinay Sharma and Kunwar Pal Singh, all from IIT Delhi, and Prof Bal Apte, Sri Madan Dasji, Sri Raj Kumar Bhatia, Sri O.P. Kohli and Sri Mahesh Chandra Sharma (all from ABVP) encouraged me during the research-period in all possible ways they could.

I express my deep appreciation for my fellow workers at Vikas Bharati Bishunpur, particularly Dr. Rakesh Popli, Sri Ashok Kumar, Sri Rajneesh Arora and Dr. Chandrahas who had a key role in the whole process. There are many others, Sri J.N.Tripathi, Sri Mahendra Bhai and Sri Haru Sahu to name a few who have provided much help for this cause.

Sri Bhaiyya Ram Lohra, Ram Chandra, Loharmen Baraik, Dewatu Singh Kherwar, Rambriksh, Jatru, Chhandu, Chaman Lohra, Nagu and Mahto Asur are some key names among the functionaries of Karigar Panchayat whose active participation in this research-process is indeed responsible for the type of field-work visualised in this thesis. Unfortunately, they (co-researchers) would miss the opportunity to go through this work because of language barrier. Due to some constraints, I could not present this work in Hindi, with the sincere hope that it is only they who will be benefitted out of this, with a better chance of being heard by present-day policy-makers and opinion-builders.

I am greatly thankful to Deendayal Research Institute, Delhi as I have been highly benefitted by its Library and other facilities and stimulating discussions with Sri Nanaji Deshmukh and Prof. R.N. Kapoor. Bharatiya Vanvasi Kalyan Ashram provided much help in this venture. Consortium on Rural Technology (CORT) extended some very critical support during the first phase of Vikas Bharati Bishunpur.

I have been extremely fortunate to have very close access to Sri Devendra Bhai (presently Vice-Chancellor, Gandhigram), Sri Dharam Palji, Sri Mohan Parikh and Sri Prem Bhai, all veteran Gandhian constructive workers and I have been greatly helped by this association in this research-task.

The Council for Advancement of People's Action and Rural Technology (CAPART), New Delhi deserves special thanks for their liberal support to Agricultural Tools Development Programme (ATDP) at Bishunpur. National Metallurgical Laboratory (CSIR), Jamshedpur, extended all possible support and guidance for technology-development programme for Bishunpur tribal area. Sri Santosh Kumar Chhawchharia (Oriental Electro-Steels) and some other manufacturers/traders of Ranchi need special mention for their active involvement in this research - programme.

Dr. Naresh Kumar, my elder brother, has been a constant inspiration throughout my academic career and he deserves much credit for this research - work.

Of course, there are many others who have contributed in their own ways. But this acknowledgement would remain incomplete if I don't mention Sri H.C. Bhatia, Sri Ramnath and Type-O-Graphic Centre who have been instrumental in production of this thesis.

Finally, Kaushal (wife) and Chaitanya (Son), whose contribution is beyond expression.

L. S. S.

6th December, 1987.

(Mahesh Sharma)
