

PROPAGATION OF ELECTROMAGNETIC WAVES
THROUGH OPTICAL WAVEGUIDES

by

Arun Kumar

Thesis submitted to the Indian Institute of Technology, Delhi
for the award of the Degree of
DOCTOR OF PHILOSOPHY

Department of Physics
Indian Institute of Technology, Delhi

December, 1975

ACKNOWLEDGMENTS

I feel great pleasure in expressing my heartfelt gratitude to Professor A.K.Ghatak, Professor M.S.Sodha and Dr. I.C.Goyal under whose supervision and guidance, I had the privilege to carry out my present research work. I am indebted to them for their valuable suggestions, encouragement and inspiration which I received from time to time.

I gratefully acknowledge the help given to me during this work by Mr.S.C.Kaushik and Mr.K.Thyagarajan. I am grateful to Dr.G.D.Gautama and Dr. B.P.Pal for their constant help and keen interest at all stages of the work. I am obliged to Dr.S.Sobhana, Dr.A.K.Agarwal, Mr.R.P.Sharma, Mr. Shradha Nand, Mr. Sri Pal Singh, Miss Anjana Gupta, Mr. B.D.Gupta, Mr. A.K.Sadhwani and Miss Enakshi Khular for their help at one stage or the other of the present work.

I express my gratefulness to my parents and other well wishers who, in many ways, encouraged me to pursue this work. I gratefully acknowledge the financial support given by C.S.I.R. (India) and help got from Computer Centre, I.I.T. Delhi.

Finally I wish to thank Mr. T.N.Gupta for an efficient typing of the thesis.

Arun Kumar

CONTENTS

CHAPTER		Page
I	INTRODUCTION	1-8
II	DISPERSION IN OPTICAL WAVEGUIDES	9-41
	A. Propagation of a Gaussian Pulse Through an Optical Fiber: Applicability of Geometrical Optics	9
	1. Geometrical Optics Approach	10
	2. Wave Optics Approach of Pulse Dispersion	13
	3. Numerical Results	18
	4. Discussion	19
	B. Dependence of Dispersion on Input Pulse Width.	24
	1. Theory	25
	2. Conclusions	31
	C. Effect of Curvature on Dispersion in Multimode SELFOC Fibers	34
	1. Impulse Response	36
	2. Broadening of Mode (m, n)	39
	3. Conclusions	40
III	MODES IN INHOMOGENEOUS SLAB-WAVEGUIDES	42-64
	A. The Perturbation Theory Approach	44
	1. Perturbation Theory for Lowest Order Modes	46
	2. Perturbation Theory for Modes Near Cutoff	49
	3. Some Numerical Results	51
	4. Perturbation Theory for Planar Waveguides Formed by Out-Diffusion Technique	53
	B. The Validity of WKB Approximation in Certain Slab-Waveguides	57
	C. Conclusion	61

IV	PERTURBATION THEORY TO STUDY THE GUIDED PROPAGATION THROUGH CLADDED PARABOLIC INDEX FIBERS	65-77
	1. Introduction	65
	2. Perturbation Theory For Modes Near Cutoff	66
	3. Perturbation Theory For Modes Far From Cutoff	70
	4. Numerical Calculations and Discussion	73
	5. Conclusions	74
	APPENDIX	78-96
	1. Nonlinear Effective Dielectric Constant	80
	2. Self-focusing and Deflection of a Laser Beam	86
	3. Discussion of Results	91
	4. Conclusions	93
