

A THESIS ON
PLASTIC EXPANSION OF A HOLE IN AN INFINITE PLATE

By

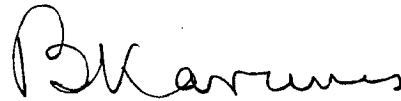

Surja Kumari
Department of Applied Mechanics
Indian Institute of Technology, Delhi.

Submitted to the Indian Institute of
Technology, Delhi, for the award of
the degree of Doctor of Philosophy.

1974

CERTIFICATE

This is to certify that the thesis entitled "PLASTIC EXPANSION OF A HOLE IN AN INFINITE PLATE" by Surja Kumari has been prepared under my supervision in conformity to the rules and regulations of the Indian Institute of Technology, Delhi. I further certify that the thesis has attained a standard required for a Ph.D. degree of the Institute. The research report and results presented in the thesis have not been submitted for any degree in any other university.

(B. KARUNES)
Head, Applied Mechanics Department
Indian Institute of Technology, Delhi.

ACKNOWLEDGEMENT

The author is extremely grateful to Professor B. Karunes, Head of the Applied Mechanics Department, Indian Institute of Technology, Delhi, for his helpful guidance and constructive criticism without which this work would not have been possible.

Special thanks are due to her brother for his invaluable help and encouragement at various stages of this work. The author is pleased to record her sincerest gratitude to Miss Santosh Jogi for her support and sympathy during the investigation.

Thanks are due to Miss Neelam Dhody for her expert typing of the manuscript.

(SURJA KUMARI)

CONTENTS

	NOTATIONS.....	vi
CHAPTER-I	INTRODUCTION.....	1
1.1	Theories of Plastic Deformations.....	1
1.2	Choice of a Boundary Value Problem to Study the Theories.....	3
1.3	The Endeavours of The Thesis.....	4
1.4	Major Observations.....	5
CHAPTER-II	BASIC EQUATIONS.....	7
2.1	Description of the Problem.....	7
2.2	Strain-Displacement Relations.....	9
2.3	Properties of the Materials Considered....	10
2.4	Equation of Motion.....	12
2.5	Boundary Conditions.....	13
CHAPTER-III	REVIEW OF THE FLOW THEORY SOLUTIONS.....	14
3.1	Short Resume of Previous Work.....	14
3.2	Governing Equations.....	16
3.3	Numerical Solution and Observations.....	23
CHAPTER-IV	EXTENSION OF THE STATE THEORY SOLUTIONS...	34
4.1	Short Resume of Previous Work.....	34
4.2	Governing Equations.....	35
4.3	Method of Numerical Analysis.....	38
4.4	Numerical Results.....	40

CHAPTER-V	INCREMENTAL THEORY SOLUTION.....	44
5.1	Introduction to the Basic Method.....	44
5.2	Governing Equations.....	45
5.3	Method of Numerical Analysis.....	50
5.4	Numerical Results.....	51
CHAPTER-VI	DYNAMIC SOLUTION.....	54
6.1	Resume of Previous Work.....	54
6.2	Governing Equations.....	55
6.3	Differential Relations Along Characteristics	61
6.4	Method of Numerical Analysis.....	65
6.5	Numerical Results.....	70
CHAPTER-VII	CONCLUDING REMARKS.....	75
	REFERENCES.....	80
