

**PULSED AND FOURIER TRANSFORM NUCLEAR
MAGNETIC RESONANCE STUDIES OF
MOISTURE AND OIL IN SEEDS**

BY
PREM NATH GAMBHIR

THESIS SUBMITTED
FOR THE AWARD OF THE DEGREE OF
DOCTOR OF PHILOSOPHY
IN PHYSICS

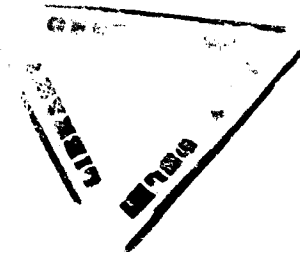

DEPARTMENT OF PHYSICS

ACKNOWLEDGEMENTS

The author wishes to express his sincere appreciation and gratitude to Dr. R.K. Puri and Dr. B.C. Panda for their valuable guidance and constant inspiration throughout the work for this thesis.

The author is very grateful and wishes to extend his sincere thanks to Dr. P.N. Tiwari for many useful discussions and help in the research work. The author expresses his gratitude to Drs. E.D. Becker and J.A. Ferretti for their valuable contribution and help in the study of selection of optimum parameters for pulse FT NMR. Thanks are also due to Mr. A.K. Agarwala for his sincere help in the study of simultaneous determination of moisture and oil in seeds. The author thanks Director and Dean, Post Graduate School, Indian Agricultural Research Institute, New Delhi for their kind permission to undertake the study for Ph.D. degree. He also thanks Project Director NRL, IARI, New Delhi for experimental facilities and the staff of NMR centre at I.I.T. Delhi and I.I.S. Bangalore for FT NMR facilities.

The author wants to express gratitude to his parents and parents-in-laws for their constant inspiration, help and encouragement during the tenure of this work. He also acknowledges the valuable contributions of his wife, Mrs. Manju Gambhir for her constant understanding and cooperation. Finally the author is grateful to his other family members and colleagues at NRL for their timely help and cooperation.
