

DIELECTRIC CONSTANT AND RELATED
PROPERTIES OF SELECTED COMPOUNDS IN
LIQUID STATE AND IN SOLUTIONS

A THESIS SUBMITTED TO THE
INDIAN INSTITUTE OF TECHNOLOGY, DELHI
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY
IN CHEMISTRY

MRS. BIMLA KWATRA

DEPARTMENT OF CHEMISTRY
INDIAN INSTITUTE OF TECHNOLOGY, DELHI
NEW DELHI - 110029
MARCH 1974

C E R T I F I C A T E

This is to certify that the thesis entitled "Dielectric constant and related properties of selected compounds in liquid state and in solutions", submitted by Mrs Bimla Kwatra for Ph. D. degree of Indian Institute of Technology, Delhi, embodies the results of original work carried out by her under my supervision in the Chemistry Department, and has not been submitted for any other degree of any university to the best of my knowledge.

V. Ramakrishna
(V. Ramakrishna)
Thesis Supervisor

ACKNOWLEDGEMENTS

I express my profound regards and gratitude to Dr V. Ramakrishna, Senior Professor in Physical Chemistry, under whose supervision and guidance I had the privilege to carry out my research work.

I am very grateful to Dr S.K. Suri and Dr (Mrs) P. Vasudevan for useful discussions. It is a pleasure to thank Dr N.K. Jha and Dr S.R. Yoganarsimhan for their keen interest in the progress of the work. It has been of immense benefit to have had the close co-operation of the Head of Department, members of the faculty and graduate students of the department, who have helped me from time to time.

Thanks are due to the Director, Indian Institute of Technology, New Delhi, and the Council of Scientific and Industrial Research, New Delhi, for the award of a research fellowship.

I also offer my thanks to Mr V.K. Rekhi for preparing the drawings and to Mr K.P.G. Nair for the efficient typing of the thesis.

Department of Chemistry,
Indian Institute of Technology,
New Delhi - 110029 (India).

Bimla Kwatra

	Pages
CHAPTER I	1-19
<u>Introduction</u>	
Theory of liquid crystalline behaviour	5
The dielectric constant and dipole moment	8
Molar polarization from experimental data	10
Applications	13
Viscosity	14
Spectral studies	16
Scope of the present study	17
CHAPTER II	
<u>Experimental Methods</u>	20-33
A. Preparation, purification and analysis of compounds	20
B. Purification of Organic Solvents	22
C. Measurements	
(i) Dielectric Constant	25
(ii) Refractive index	27
(iii) Density/Specific volume	27
(iv) Viscosity	28
(v) Differential Thermal Analysis (DTA)	29
(vi) I.R.	30
(vii) Solubility	31
D. Table:	
Physical constants of the compounds and solvents used.	33

CHAPTER III : Compounds I, II & III

<u>Results and Discussion</u>	34-67
Polarization and Dipole Moment	
(a) Methods of calculation	35
(b) Molar Refractivity	40
(c) The term $\partial \epsilon_1 / \partial \omega_2$	42
(d) The Onsager Method	45
(e) The experimental dipole moment	46
(f) The shape factor	50
(g) The temperature effect	53
(h) Dipole moments based on the determination in the molten state	54
(i) Calculated μ values	56
The molten state	59
The viscosity determination	61
i.r. spectra	65
Tables I - XVIII	68-113
Figures	

CHAPTER IV : Compounds IV & V

<u>Results and Discussion</u>	114-125
Polarization and Dipole moment	115
Temperature Effect	117
Dipole moment based on the determination in the molten state	118
Calculated μ values	118
The molten state	119
