

SOME STUDIES ON OPTIMUM RECEIVER DESIGN
VIA RECURSIVE STATE ESTIMATION

BHARAT B. MADAN

Thesis submitted to the
Indian Institute of Technology, Delhi
for the award of the degree of
DOCTOR OF PHILOSOPHY

Department of Electrical Engineering
Indian Institute of Technology, Delhi
May, 1976

ACKNOWLEDGEMENT

The thesis describes the results of investigations carried out by the author in the area of Estimation Theory over a period from October 1972 to March 1976 at the Indian Institute of Technology, Delhi. The author would like to express his deep sense of gratitude to Professor A.K.Mahalanabis for the help, encouragement and guidance throughout the course of this work. It was entirely through his constant efforts that I was able to take up this work.

The author is extremely grateful to Professor P.V. Indiresan, Ex-Head, School of Radar Studies, for his constant encouragement and to Dr. S.Prasad for providing several valuable suggestions throughout the course of this work. Thanks are also due to some friends, particularly to Dr.K.K.Biswas and Mr. R.Rana for some useful discussions, and to Mr. J.N.Saini for his patient typing of the manuscript.

(Bharat B. Madan)

SECTION	Pag
<u>Chapter 1</u>	
REVIEW AND PROBLEM STATEMENTS	
1.1 Introduction	... 1
1.2 Message Model	... 2
1.3 Observation Model	... 4
1.4 Brief Survey of the Problem of Optimum Demodulation	... 6
1.5 Signal Estimation with Interrupted Observations	... 10
1.6 Communication in the Presence of Impulsive Noise.	... 12
1.7 Radar Receiver Design Problem	... 13
1.8 Problem Statements	... 17
<u>Chapter 2</u>	
SMOOTHED ESTIMATION FOR LINEAR SYSTEMS WITH INTERRUPTED OBSERVATIONS	
2.1 Introduction	... 23
2.2 Problem Statement	... 25
2.3 State Augmentation Approach to Fixed Lag Smoothing	... 27
2.4(a) Constrained Linear Smoothing Estimator	... 29
2.4(b) Steady State Error Covariance Analysis	... 32
2.5 Non-Linear Smoothing Estimator	... 34
2.6 Numerical Example	... 41
2.7 Continuous Time Smoothing	... 45
2.8 Derivation of Smoothing Algorithm	... 48

Chapter 3

ZERO LAG RECEIVERS FOR ANALOG COMMUNICATION IN THE PRESENCE OF IMPULSIVE NOISE

3.1	Introduction	...	53
3.2	Formulation of the Problem	...	55
3.3	The case of Amplitude Modulation		
	(a) 'Linearized' Receiver Structure	...	57
	(b) Non-Linear Amplitude Demodulator	...	63
3.4	The case Phase Demodulation		
	(a) 'Linearized' Phase Demodulator	...	68
	(b) Non -Linear Phase Demodulator	...	72
3.5	Simulation Results	...	78

Chapter 4

FINITE LAG RECEIVERS FOR ANALOG COMMUNICATION IN THE PRESENCE OF IMPULSIVE NOISE

4.1	Introduction	...	83
4.2(a)	'Linearized' Finite Lag Amplitude Demodulator	...	84
4.2(b)	Non-Linear Finite Lag Amplitude Demodulator	...	90
4.3(a)	'Linearized' Finite Lag Receiver for PM Case	...	93
4.3(b)	Non-Linear Phase Demodulator	...	97
4.4	Results of Simulation Study	...	100

Chapter 5

DESIGN OF QUASI-OPTIMUM PHASE AND FREQUENCY DEMODULATORS IN THE PRESENCE OF NON-LINEARITY IN THE PHASE MODULATOR

5.1	Introduction	...	104
5.2	Problem Formulation	...	105
5.3	Receiver Structure for Phase Modulated Signals	...	107

5.4	Finite Delay Receiver for Phase Modulated Signals.	...	111
5.5	Frequency Modulation Case	...	114
5.6	Performance Analysis	...	118

Chapter 6

A RECEIVER FOR ESTIMATION AND DETECTION OF DOPPLER SHIFTED SIGNALS

6.1	Introduction	...	124
6.2	Formulation of the Problem	...	126
6.3	Simultaneous Signal and Frequency Estimator	...	131
	(b) Mean Square Error Bound for Estimating Frequency Shift	...	133
6.4	Joint Detection, Signal and Parameter Estimator	...	136

Chapter 7

SUMMARY AND SOME SUGGESTIONS FOR FURTHER WORK

7.1	Brief Summary	...	143
7.2	Suggestions for Further Work	...	147
	REFERENCES	...	149
