

MOLECULAR CHARACTERIZATION OF MULTIPLE PLASMIDS OF *CORYNEBACTERIUM RENALE*

by

NIHARIKA NATH

Department of Biochemical Engineering and Biotechnology

*Thesis submitted
in fulfilment of the requirement
for the award of the degree of
DOCTOR OF PHILOSOPHY*

to the

INDIAN INSTITUTE OF TECHNOLOGY, DELHI

HAUZ KHAS, NEW DELHI - 110016, INDIA

JULY, 1996

CERTIFICATE

This is to certify that the thesis entitled "**Molecular Characterization of Multiple Plasmids of *Corynebacterium renale***", being submitted by **Niharika Nath** to the Indian Institute of Technology, Delhi, for the award of Degree of **Doctor of Philosophy**, is a bonafide research work carried out by her under my supervision and guidance. The results obtained in this thesis have not been submitted to any other University or Institute for the award of any other degree or diploma.

(J.K. Deb)

Associate Professor,
Deptt. of Biochemical Engg.
and Biotechnology,
Indian Institute of Technology Delhi
New Delhi-110 016

ACKNOWLEDGEMENT

I take this opportunity to express sincere gratitude towards Dr.J.K.Deb, Associate Professor and supervisor, for his constant guidance and deep sense of involvement in the present work. I shall remain ever grateful to him.

I thank Prof. Subhash Chand, Head, Deptt. of Biochemical Engineering & Biotechnology, for providing facilities that enabled smooth functioning of experimental work. Thanks are also due to Dr. V.S.Bisaria, Dr. A.K.Dubey and Dr. S.N. Mukhopadhyay for their suggestions and criticism of this work. I acknowledge Dr. P.K.Roy Chowdhury for his friendly and practical advice.

I am grateful to Dr. K.B. Roy, Chairman, Centre for Biotechnolgy, JNU and Dr. Y.D.Sharma, Department of Biotechnology, AIIMS for helping to solve some problems I faced during DNA sequencing.

The cooperation of the staff of DBEB will always be remembered. Thanks are due to our "Research Lab" team- Mrs. Mathai, Kishan, Bhagwan Singh, Ranaji, Negi, Mukesh and also to Mr. V.K.Ghosh. The untiring efforts of Mr. J.A.Khan for troubleshooting disturbances in power supply even at odd hours are gratefully acknowledged. Thanks are due to Mr. D.V.Sharma, Mr. Yadav for their technical help. I owe thanks to Mrs. Neera for library help, to Sunita especially for informing me about faxes from my husband, to all others for cooperation and pleasant company.

My friends and colleagues deserve special mention. Thanks are due to S.K.Bhattacharya, K.J. Mukherjee, Nandini and Simmi for critical suggestions and most of all their company, to Apurba, Malini, Benu, Praveen, Manjula, Jana for the memorable treats we had for no great reason, to Sanghamitra for always cheering me up, to Gautam, Sahi and Anushree for the hassles of lab class.

Thanks are due to Samsheer Singh Dagar for typing this thesis.

There can be no words to thank my parents for their encouragement. Last but not least, I acknowledge my husband for his constant moral support during these years. I think we both learnt that patience is gold.

(NIHARIKA NATHI)

CHAPTER 1	INTRODUCTION AND OBJECTIVE	
1.1	Introduction	1
1.2	Objectives	5
CHAPTER 2	LITERATURE REVIEW	
2.1	Introduction	7
2.2	Plasmids of Gram negative bacteria	11
2.3	Plasmids of Gram positive bacteria	17
	2.3.1 Plasmids of <i>Staphylococcus</i> and <i>Bacillus</i>	
	2.3.2 Plasmids of <i>Streptomyces</i>	
2.4	Plasmids of Corynebacteria	23
	2.4.1 Introduction	
	2.4.2 Endogenous Plasmids	
	2.4.3 Genetic organization of plasmids of corynebacteria	
	2.4.3.1 pBL1	
	2.4.3.2 pCG100	
	2.4.3.3 pSR1	
	2.4.3.4 pNG2	
2.5	Multiple plasmid systems	35
2.6	Plasmid curing	38
CHAPTER 3	MATERIALS AND METHODS	43-61
3.1	Bacterial strains and plasmids	
3.2	Isolation of DNA from corynebacteria	
	3.2.1 Large scale plasmid isolation	
	3.2.2 Small-scale plasmid isolation.	
	3.2.3 Isolation of chromosomal DNA	
3.3	Preparation of total lysate of corynebacterial cells	
3.4	Purification of plasmid by ultracentrifugation	
3.5	Agarose gel electrophoresis	

3.6	Restriction enzyme digestion
3.7	DNA ligation
3.8	DNA elution from agarose gels
3.9	DNA elution from polyacrylamide gels
3.10	Transformation of corynebacteria
3.11	Transformation of <i>E. coli</i> cells
3.12	Isolation of <i>E. coli</i> plasmids
3.12.1	Large scale plasmid isolation
3.12.2	Small scale plasmid isolation
3.13	Colony Lysis: Rapid screening of DNA
3.14	Estimation of copy number
3.15	DNA labelling
3.16	Southern blot hybridization
3.17	Preparation of cell free extract
3.18	Preparation of polyacrylamide minigel
3.19	DNA mobility shift assay
3.20	Preparation of sequencing gel
3.21	Sequencing reactions
3.22	Running of sequencing gel
3.23	Purification synthetic oligonucleotides
3.24	Plasmid curing
3.25	Biochemical tests

CHAPTER 4 RESULTS AND DISCUSSION

4.1	Physical characterization of <i>C. renale</i> plasmids	62
4.2	Curing of <i>C. renale</i> plasmids	76
4.3	Replication of other corynebacterial plasmids in <i>C. renale</i>	85
4.4	Sequence analysis of pCR1	95
