whose constant championship brought me up and
made me enter the enterprising academic life.

C E R T I F I C A T E

This is to certify that the thesis entitled "Studies on Triglyceride Fatty Acids from a Fresh Water Fish Puntius sarana (Isolation, Characterisation and their Variation with Size)" being submitted by Rita Mitra to the Indian Institute of Technology, Delhi for the award of the degree of Doctor of Philosophy, is a record of bonafide research work carried out by her. Rita Mitra has worked under my guidance and supervision and has fulfilled the requirements for the submission of this thesis, which to my knowledge, has reached the requisite standard.

The results contained in this thesis have not been submitted in part or in full, to any other university or institute for the award of any degree or diploma.

(J.C. Ahluwalia)

ACKNOWLEDGEMENTS

I express my profound gratitude to Professor R.D. Das for his unreserved guidance and constant encouragement. He welcomed me to work in an interdisciplinary field and provided an ever-stimulating and inspiring environment. This offered a robust challenge for me to move from a classical background to a new area.

Mr. S.K. Jain, Indian Oil Corporation Limited, Research and Development Centre (Faridabad) earns my special thanks for the help he so freely rendered in the analysis of the samples on Gas Chromatograph. It would not have been possible to complete the experimental work in time without his invaluable help and suggestions.

I wish to express my sincere gratitude to my colleagues and friends, Dr. A. Dixit, Mr. G.S. Dodi, Dr. M.P. Rao, Miss Karlosh Gupta, Miss S. Moora, Mr. S.K. Srivastava and Dr. S. Sobhana who shared my excitements and disappointments which punctuated the progress of this work.

I also make a particular mention of Mr. N.K. Nartiyal, but for whose alert and eager attention to equipments progress of the work would have slowed down.

I thank Mr. S.L. Anuja for his competent and dependable typing and Mr. N.L. Arora for the skill and care he took to trace the figures.

I am thankful to Professor J.C. Ahluwalia, Head of the Chemistry Department, Indian Institute of Technology, Delhi for providing the necessary facilities.

I am grateful to the authorities of the Indian Oil Corporation Limited, Research and Development Centre, for permitting the use of the facilities of their laboratory at Faridabad for carrying out a part of the measurements.

I gratefully acknowledge the financial assistance provided by the Indian Council of Agricultural Research and the Council of Scientific and Industrial Research, India towards completion of this work.

I am beholden to the members of my family for their patience and faith and also for the encouragement and inspiration that I so abundantly received from them.
