

ON SEISMIC DECONVOLUTION USING
NEW ESTIMATION ALGORITHMS

K.P. MOHANADAS

Thesis submitted to the
Indian Institute of Technology, Delhi
for the award of the degree of
DOCTOR OF PHILOSOPHY

Department of Electrical Engineering
Indian Institute of Technology
New Delhi 110 016

JULY 1981

CERTIFICATE

This is to certify that the thesis entitled "On Seismic Deconvolution using New Estimation Algorithms" being submitted by K.P. Mohanadas for the award of the degree of Doctor of Philosophy to the Indian Institute of Technology, Delhi, is a record of the bonafide research work he has done, during the period from July 1978 to July 1981 under our supervision. The results obtained in this thesis have not been submitted to any other University or Institute for the award of any degree or diploma.

A.K. Mahalanabis

Surendra Prasad

IN LOVING MEMORY OF

MY LATE MOTHER

ACKNOWLEDGEMENTS

I shall like to take this opportunity for recording my sincere appreciation of the effective guidance of my supervisors Professor A.K. Mahalanabis and Dr. Surendra Prasad who not only suggested the problems, but also helped at every stage of the work. Their keen interest in my work and constructive suggestions were a great help to me in my attempt to develop some algorithms useful for real seismic data deconvolution.

I am also thankful to the authorities of the Institute of Petroleum Exploration, Oil and Natural Gas Commission of India for providing the real data and for the computer facilities and specifically to Mr. V.C. Mohan, Director (Geophysics) and Mr. N.D.J. Rao, Deputy Superintending Geophysicist (Computer Services Division) for many helpful discussions on the seismic deconvolution problem.

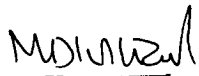

It is with pleasure that I place on record my thanks to my colleagues Dr. M. Hanmandlu, Messrs. Sathya Sheel, R.G. Rao, G. Ray, and R. Prasad for the useful discussions and Dr. C.K. Pillai, E. Gopinathan, R.R. Nair, and R. Sudhakar for making my life in the Institute more enjoyable. I am thankful to my wife Malathy and children Mini and Manoj for their cheerful company which has made my work easier than expected. I am grateful to my father, K.P. Panicker and brother, Prof. K.P. Sasidharan, who have made me what I am.

The financial help received from the Ministry of Education, Government of India, and Principal, Calicut Regional Engineering College, in the form of a fellowship under the Quality Improvement Programme is duly acknowledged.

Finally, I wish to thank Sri P.M. Padmanabhan Nambiar, for making a neat job of typing the manuscript.

I.I.T., Delhi

15 July, 1981

K.P. MOHANADAS

" So far as Mathematics do not tend to make men more sober and rational thinkers, wiser and better men, they are only to be considered as an amusement, which ought not to take us off from serious business."

- Thomas Bayes

CHAPTER 1

REVIEW AND SCOPE OF THE THESIS	
1.1 INTRODUCTION	1
1.2 SEISMIC DATA PROCESSING	2
1.2.1 Data Acquisition	2
1.2.2 Data Processing	5
1.2.3 Requirements of Present Day Seismic Data Processing	9
1.3. REVIEW OF THE EXISTING METHODS FOR DECONVOLUTION	10
1.3.1 Time Series Methods	12
1.3.2 State Variable Methods	19
1.3.3 Frequency Domain Methods	23
1.4 LIMITATIONS OF THE EXISTING METHODS	25
1.4.1 Predictive Deconvolution	25
1.4.2 Kalman Filter Applications	26
1.4.3 White Noise Estimation Approach	26
1.4.4 Detection and Estimation Approach	27
1.4.5 Adaptive Deconvolution Methods	28
1.5 SCOPE OF THE THESIS	28

CHAPTER 2

REAL SEISMIC DATA DECONVOLUTION USING KALMAN
PREDICTOR MODEL

2.1	INTRODUCTION	33
2.2	PROBLEM FORMULATION	35
2.3	THE IDENTIFICATION ALGORITHM	37
2.4	RESULTS OF IDENTIFICATION ALGORITHM	42
2.4.1	Identification Results - Simulated Data	42
2.4.2	Identification Results - Real Data	46
2.5	RESULTS OF PREDICTIVE DECONVOLUTION	49
2.5.1	Results of Predictive Deconvolution - Simulated Data	49
2.5.2	Results of Predictive Deconvolution - Real Data	54
2.6	COMPARATIVE STUDY OF THE KALMAN PREDICTOR AND AR PREDICTOR BASED ALGORITHMS	56
2.7	CONCLUDING REMARKS	66

CHAPTER 3

WHITE NOISE ESTIMATORS FOR REAL SEISMIC DATA

3.1	INTRODUCTION	67
3.2	PROBLEM FORMULATION	68
3.3	MODEL IDENTIFICATION	70
3.4	WHITE NOISE ESTIMATION ALGORITHM	76
3.5	RESULTS OF REAL DATA PROCESSING	78
3.6	CONCLUDING REMARKS	88

CHAPTER 4

MAP DETECTION AND DECISION DIRECTED ESTIMATION OF
REFLECTION COEFFICIENTS

4.1	INTRODUCTION	89
4.2	PROBLEM FORMULATION	90
4.3	ESTIMATION OF REFLECTION LOCATIONS	93
4.4	ESTIMATION OF REFLECTION AMPLITUDES	99
4.5	EXPERIMENTAL RESULTS	100
4.6	COMPARISON OF ML AND MAP DETECTORS	103
4.7	CONCLUDING REMARKS	113

CHAPTER 5

KALMAN IDENTIFIERS FOR ADAPTIVE DECONVOLUTION

5.1	INTRODUCTION	114
5.2	ALGORITHMS FOR ADAPTIVE DECONVOLUTION	116
5.2.1	Adaptive Deconvolution via CKA	117
5.2.2	FKA for Adaptive Deconvolution	119
5.2.3	Improved Deconvolution via FKA	122
5.3	COMPARATIVE STUDY OF THE ALGORITHMS BASED ON SIMULATED DATA	124
5.3.1	Rate of Parameter Convergence and Sensitivity to Initial Parameters	125
5.3.2	Deconvolution Results via CKA, FKA and Smoothing	129
5.3.3	Computational Requirements	133
5.4	RESULTS OF REAL DATA PROCESSING	134
5.5	CONCLUDING REMARKS	143

CHAPTER 6

ADAPTIVE LATTICE ALGORITHMS FOR DECONVOLUTION OF
NONSTATIONARY DATA

6.1	INTRODUCTION	144
6.2	ADAPTIVE LATTICE STRUCTURES	146
6.2.1	Review of Adaptive Gradient Lattice	147
6.2.2	Least Squares Lattice	152
6.2.3	Improved Deconvolution Using Lattice Filter	156
6.3	COMPARATIVE STUDY OF THE ALGORITHMS BASED ON SIMULATED DATA	156
6.3.1	Rate of M.S. Convergence and Sensitivity to Algorithm Parameters	157
6.3.2	Predictive Deconvolution Results : Simulated Data	161
6.3.3	Computational Requirements	166
6.4	RESULTS OF REAL DATA PROCESSING	169
6.5	CONCLUDING REMARKS	179

CHAPTER 7

DECONVOLUTION OF SEISMIC DATA USING
ARMA PREDICTORS

7.1	INTRODUCTION	180
7.2	PROBLEM FORMULATION	182
7.3	ARMA ORDER DETERMINATION	184
7.4	DECONVOLUTION WITH ARMA MODELS	187
7.4.1	Box and Jenkin's Approach to ARMA Modelling	188
7.4.2	Recursive ARMA Algorithm	189

7.5 RESULTS OF EXPERIMENTS ON SIMULATED DATA	191
7.5.1 Deconvolution Results on Simulated Data	191
7.5.2 Results of ARMA Deconvolution on Real Data	194
7.6 CONCLUDING REMARKS	202
 CHAPTER 8	
COMPARATIVE STUDY OF ALGORITHMS FOR REAL DATA PROCESSING	
8.1 INTRODUCTION	203
8.2 CRITERIA FOR COMPARISON	203
8.3 RESULTS OF THE COMPARATIVE STUDY	205
8.3.1 Non-adaptive Algorithms	205
8.3.2 Adaptive Algorithms	209
8.4 CONCLUDING REMARKS	213
 CHAPTER 9	
CONCLUDING REMARKS AND SUGGESTIONS FOR FURTHER WORK	
9.1 INTRODUCTION	214
9.2 SUMMARY OF RESULTS	214
9.3 SUGGESTIONS FOR FURTHER WORK	218
9.3.1 Extension of the work of Chapter 2	219
9.3.2 Future Work on MAP Algorithm of Chapter 4	219
9.3.3 Fast Filtering Algorithms based on ARMA Model	220
9.3.4 Vector Data Processing	221
9.3.5 Multidimensional Processing	221
