

NUMERICAL MODELS FOR POLLUTANT DISPERSION
IN THE ATMOSPHERE

Thesis

by

SWATI BASU

Centre for Atmospheric and Fluids Sciences
Indian Institute of Technology, New Delhi

Submitted to the Indian Institute of Technology, Delhi
for the award of the degree of

DOCTOR OF PHILOSOPHY

1983

... to my parents

CERTIFICATE

This is to certify that the thesis entitled
'NUMERICAL MODELS FOR POLLUTANT DISPERSION IN THE ATMOSPHERE'
being submitted by SWATI BASU for the award of the degree of
DOCTOR OF PHILOSOPHY, is a record of the original bonafide
research work carried out by her. She has worked under our
joint guidance and supervision and has fulfilled the require-
ments for the submission of this thesis. The results presented
in this thesis have not been submitted in part or full to any
other University or Institute for award of any degree/diploma.

ACKNOWLEDGEMENTS

I am deeply indebted to Dr.(Mrs.) N. Raghavan under whose supervision I have worked for the last three and a half years, for her painstaking guidance, immense help and constant encouragement throughout this work.

I am also grateful to Dr. O.P. Sharma for his help from time to time.

I am grateful to Professor M.P. Singh who in his capacity as Head of the Department extended all the necessary facilities and help and encouragement throughout the duration of this work.

My sincere thanks are due to India Meteorological Department for provision of various data which was required from time to time and also to Department of Science and Technology for sponsoring the project at the Centre for Atmospheric and Fluids Sciences, I.I.T., New Delhi.

I thank Miss Neelam Dhody for her accurate and meticulous typing of the thesis.

Finally, I would like to thank my husband and in-laws without whose cooperation and encouragement it would not have been possible to complete the work.

Basu.

(SWATI BASU)

CONTENTS

	<u>Page</u>
ABSTRACT	i-iii
CHAPTER I: REVIEW	
1.1 Introduction	1
1.2 The Need for PBL Model	2
1.3 Summary of Selected PBL Models	3
1.4 K-theory and Turbulent Energy (TE) Equation	5
1.5 Dispersal of Pollutants	10
1.6 The Coupled Model	12
CHAPTER II: ASSUMPTIONS AND FORMULATION	
2.1 Introduction	30
2.2 PBL Model Assumptions	33
2.3 Formulation of Mixing Lengths	35
2.4 Simplification of the Advection Diffusion Equation	38
2.5 Model Equations and Formulation	41
2.6 Numerical Schemes and Procedure	44
2.7 Input Parameters	48
CHAPTER III: THE NEUTRAL BOUNDARY LAYER	
3.1 Introduction	50
3.2 Model Formulation	51
3.3 Numerical Experiments	54
3.4 Comparison With Observations	58
3.5 Height of Maximum Diffusivity	59
3.6 Discussion of Results	60
3.7 Conclusions	65

	<u>Page</u>
CHAPTER IV: THE NOCTURNAL BOUNDARY LAYER	
4.1 Introduction	68
4.2 Model Formulation	69
4.3 Numerical Experiments	73
4.4 Discussion of Results	78
4.5 Conclusion	82
CHAPTER V: CONVECTIVE BOUNDARY LAYER	
5.1 Introduction	86
5.2 Model Formulation	89
5.3 Numerical Experiments	92
5.4 Discussion of Results	94
5.5 Conclusion	95
CHAPTER VI: THE ADVECTION DIFFUSION MODEL	
6.1 Introduction	96
6.2 Assumptions and Formulations	100
6.3 Numerical Experiments	104
6.4 Discussion of Results	108
6.5 Conclusions	110
CHAPTER VII: THE COUPLED MODEL	
7.1 Introduction	115
7.2 Model Formulation	117
7.3 Numerical Experiments	119
7.4 Discussion of Results	127
7.5 Conclusion	131

CHAPTER VIII: SUGGESTIONS FOR FUTURE WORK

8.1 Achievements 135

8.2 Future Work Suggested 136

8.3 Conclusions 138
