

THERMAL DEGRADATION OF POLYVINYLCHLORIDE

AND

RELATED POLYMERS

A Thesis submitted to:

THE INDIAN INSTITUTE OF TECHNOLOGY, DELHI.

for the degree of

DOCTOR OF PHILOSOPHY

in

CHEMISTRY

SURJAN SINGH GROVER
DEPARTMENT OF CHEMISTRY.

May, 1972.

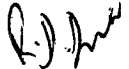

CERTIFICATE

This is to certify that the thesis entitled "Thermal degradation of polyvinylchloride and related polymers" being submitted by Mr. Surjan Singh Grover to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Chemistry, is a record of bonafide research work carried out by him. Mr. Surjan Singh Grover has worked under my guidance and supervision, and has fulfilled the requirement for the submission of this thesis, which to my knowledge, has reached the requisite standard.

The results contained in this thesis have not been submitted, in part or full, to any other university or institute for the award of any degree or diploma.

I. K. Varma

(I. K. Varma)
Thesis Supervisor

(R.D. Dua)
Head, Chemistry Department,
Indian Institute of Technology, Delhi,
Hauz Khas - New Delhi-29 (INDIA)

ACKNOWLEDGEMENTS

The author wishes to place on record his deep sense of gratitude to Dr. (Mrs.) I.K. Varma for her guidance, encouragement and painstaking supervision. He is grateful to Prof. R.D. Dua, Head of the Chemistry Department, for providing necessary facilities. He wishes to gratefully acknowledge the valuable suggestions and continuous encouragement from Dr. V. Ramakrishna, Senior Professor, from time to time. It is a pleasure to acknowledge the co-operation received from all the members of the faculty of the Chemistry Department.

Thanks are due to the Indian Institute of Technology, Delhi for the award of research fellowship.

The author thanks Miss C.K. Geetha, research scholar in Chemistry Department for her valuable help in proof reading and correction.

Lastly, the author's thanks go to Mr. M.P. Sharma, for executing the task of typing the manuscript with great care and thoroughness.

Surjan Singh Grover,
Chemistry Department,
INDIAN INSTITUTE OF TECHNOLOGY, DELHI.

C O N T E N T S

<u>CHAPTER - I</u>	<u>Introduction</u>	1- 29
	Degradation of high polymers in general	2
	Structure of PVC	5
	Some structural abnormalities in PVA, and PVAc	11
	The mechanism of degradation of PVC, PVA, and PVAc	13
	The degradation of PVC in nitrogen atmosphere	14
	The degradation in presence of oxygen	20
	Mechanism of the degradation of PVA and PVAc	22
	Influence of temperature on the degradation	23
	Effect of HCl on the dehydrochlorination of PVC.	24
	Stabilisation of PVC	25
<u>CHAPTER - II</u>	<u>Fractionation of PVC, PVA, and PVAc</u>	
	&	
	<u>Thermogravimetric analysis of various fractions.</u>	30 -54
	Experimental:	32
	Fractionation of polymers	33
	Reprecipitation of the fractions	34
	Viscosity measurements	35
	Thermal analysis	35

	Evaluation of data	36
	Results	41
	Discussion	49
<u>CHAPTER III</u>	<u>Thermal degradation of polyvinyl- chloride and polyvinylacetate in solution</u>	55 -85
	Experimental:	55
	Apparatus used for pyrolysis	55
	Heating media	57
	Phenolic solvents	58
	Purification of the Phenolic solvents.	58
	Preparation of 2-allylphenol, and 2-allyl-6-methylphenol.	59
	Purification of polymers	60
	Description of a typical run	61
	Results	62
	Discussion	78
	Influence of polar effects of substituents on the rate of dehydrochlorination.	79
	Influence of steric effects of substituents, on the rate of dehydrochlorination	81
	Influence of allylic group on the rate of dehydrochlorination	82
	Abnormal rates of dehydrochlorination in certain solvents.	83

	Kinetic parameters in various solvents	84
	Thermal degradation of PV..c	85
CHAPTER-IV	<u>Studies of the absorption spectra of degraded PVC, PVA and PVAc in solution.</u>	86-102
	Experimental	87
	Preparation of Polymer sample	87
	Results	89
	Effect of solvents	89
	Effect of polymer concentration	90
	Effect of heating time	91
	Effect of temperature	91
	Effect of storage on the degraded sample in the presence of atmospheric oxygen at room temperature	92
	Effect of storage on the degraded sample of PVC in vacuum at room temperature	92
	The absorption spectra of thermally degraded PVAc	93
	Discussion	93
CHAPTER-V	<u>Thermal degradation of some low molecular weight chlorides in solution</u>	103-115
	Experimental:	104
	Preparation of n-dodecylchloride	104
	Preparation of 2-chlorododecane	105
	Preparation of 1,1,3-trichlorononane	106
	Preparation of dichlorononene	107

Results	108
Thermal degradation of 1-chloro- dodecane (1-DDCl), 2-chlorododecane (2-DDCl), 1,1,3-trichlorononane(TCN), and dichlorononene (DCN) in bulk.	108
Effect of temperature on the degra- dation of 1-DDCl, 2-DDCl	109
Effect of solvents on the dehydro- chlorination of 1-DDCl, 2-DDCl, TCN and DCN	110
Discussion	113
<u>CHAPTER -VI</u> <u>General discussion</u>	116-125
<u>REFERENCES</u>	126-136
<u>LIST OF PUBLICATIONS</u>	137
