

**PHYSICS OF COLLOIDAL PLASMAS AND MAGNETOHYDRODYNAMIC
POWER GENERATION**

Samiran Guha

**Thesis submitted to Indian Institute of Technology, Delhi
for partial fulfilment of the Degree of
Doctor of Philosophy**

1968

ACKNOWLEDGMENTS

The author wishes to express his deep sense of gratitude to Professor M.S. Sodha for his valuable guidance, kind encouragement and inspiration.

The author is greatly indebted to Dr. P.K. Kaw for his helpful suggestions and discussions at various stages of this work. The author also wishes to express his sincere thanks to Professor S.C. Jain for the kind encouragement and help that was extended to him. Thanks are also due to Mr. M.P. Joseph for an efficient typing of this thesis.

The author is thankful to the Council of Scientific and Industrial Research (India) for financial assistance.

TABLE OF CONTENTS

	Page
ACKNOWLEDGMENTS	
PREFACE	1
Chapter I : PHOTOELECTRIC ENHANCEMENT OF ELECTRICAL CONDUCTIVITY IN DUST-LADEN GASES	12
1. Introduction	12
2. Photoelectric Enhancement	16
2.1 Electron Density	16
2.2 Electron Collision Frequency	21
2.3 Numerical Results and Discussion	22
Bibliography	28
Chapter II : PROPAGATION OF ELECTROMAGNETIC WAVES IN COLLOIDAL PLASMAS	30
1. Linear Wave Propagation	30
1.1 Introduction	30
1.2 Electron Collision Frequency and Density	31
1.3 Current Density	34
1.4 Wave Equation	35
1.5 Reflection of the Wave	37
1.6 Numerical Results and Discussion	38
2. Nonlinear Wave Propagation	41
2.1 Introduction	41

2.2	Electron Temperature and Current Density	..	42
2.3	Wave Equation	..	47
2.4	Discussion	..	49
	Appendix	..	50
	Bibliography	..	52
Chapter III :	ELECTRONIC CONDUCTIVITY OF ADDITIVELY COLORED ALKALI HALIDE CRYSTALS	..	53
1.	Introduction	..	53
2.	Electron Density	..	57
3.	Mobility of Electrons	..	59
4.	Numerical Results for KCl and Discussion	..	60
4.1	Electronic Conductivity	..	60
4.2	Electron Affinity	..	63
	Bibliography	..	65
Chapter IV :	PHOTOCONDUCTIVITY OF ADDITIVELY COLORED ALKALI HALIDE CRYSTALS	..	67
1.	Introduction	..	67
2.	Electron Density	..	69
3.	Mobility of Electrons	..	73
4.	Numerical Results and Discussion	..	74
	Bibliography	..	78
Chapter V :	SOME INVESTIGATIONS IN MAGNETO-HYDRODYNAMIC POWER GENERATION	..	79
1.	Introduction	..	79

2. Optimum Seeding in a Non-equilibrium Helium-Cesium System	..	80
2.1 Introduction	..	80
2.2 Electron Collision Data	..	81
2.3 Condition for Optimum Seeding	..	82
2.4 Numerical Results and Discussion	..	87
3. Effective Conductivity in a Segmented-Electrode Magneto-hydrodynamic Power Generator with Elevated Electron Temperature	..	87
3.1 Introduction	..	87
3.2 Effective Conductivity	..	88
3.3 Numerical Results	..	93
Bibliography	..	94
