*THESIS SUBMITTED
IN FULFILMENT OF THE REQUIREMENTS FOR
THE DEGREE OF
DOCTOR OF PHILOSOPHY*

to the
INDIAN INSTITUTE OF TECHNOLOGY, DELHI

HAUZ KHAS, NEW DELHI-110016

JUNE, 1993

CERTIFICATE

This is to certify that the thesis entitled "STUDIES ON POLLUTANTS GENERATED FROM DOMESTIC FUELS AND THEIR IMPACT ON ENVIRONMENT" being submitted by Mr. Jai Ballabh Kandpal to the Indian Institute of Technology, Delhi for the award of Doctor of Philosophy is a record of bonafide research work carried out by him under my guidance and supervision in conformity with rules and regulations, of Indian Institute of Technology, Delhi.

The results contained in this thesis have not been submitted in part or in full, to any other University or Institute for the award of any degree or diploma.

DR. R.C. MAHESHWARI
Centre for Rural Development
and Technology
Indian Institute of Technology
New Delhi - 110016
India

ACKNOWLEDGMENT

It is my privilege to have worked under the worthy guidance of Prof. R.C. Maheshwari to whom I am sincerely indebted for sparing his valuable time in active participation and discussion.

My sincere gratitude is due to Prof. P.L. Dhar, Head, Centre for RD&T and Prof. P. Vasudevan, former Head of the Centre for providing necessary facilities and constant encouragement for carrying out this research work.

I am sincerely thankful to Dr. T.C. Kandpal of Centre for Energy Studies, IIT Delhi for rendering help at every time whenever I needed it. I am also thankful to Dr. Veena Joshi, TERI who despite of her tight schedule always helped and encouraged me.

I am thankful to Dr. Madan, Dr. Sorayan, Dr. Jagpal Singh, Dr. Prasad, Dr. Santosh and Dr. Kaur of Centre for Rural Development and Technology, for supporting me in resolving some of my difficulties encountered during the research work.

Thanks are also due to Dr. Mishra of Patel Chest Institute, University of Delhi, Dr. Dhammi of NPL, New Delhi, Dr. Mathpal, Dr. J.S. Rawat of K.U. Nainital and Mr. A. Karnatak of GAIL for their help at various stages during the work.

I am also thankful to Head, Deptt. of Chemistry, Dr. Jagga of ITMEC, IIT Delhi, Staff of TBU, NPIC, CRDT and M/S Nucon Engineers for providing facilities during the experimental work.

Financial support given by Indian Institute of Technology, Delhi is gratefully acknowledged.

I am grateful to my thesis examiners for constructive criticism /making certain suggestions which helped me in self assesment and hope certainly will benefit in my future endeavours.

My deep sense of gratitude is also due to my parents, brothers and other family members who have always been a perpetual source of inspiration and encouragement since my childhood days.

My wife Asha's incessant pestering and prayers have helped me in completing this task so successfully.

At last but not at least, I accomplish happily the selfless help and co-operation of my colleagues and friends, Naik, Ashok, Jain, Sadhana, Hem, Sushil, Prabhat, Madan, Shova, Sandhya, George and Siddarthan who have supported me in many ways in this venture.

J.B. KANDPAL

ABSTRACT

CHAPTER - 1 INTRODUCTION 1-12

REFERENCES

CHAPTER - 2 REVIEW OF LITERATURE 13-44

2.1 Biomass stoves 13

2.2 Conversion to charcoal 16

2.2.1 Recovery of carbonization by-products 18

2.2.2 Charcoal stove 20

2.3 Emission from domestic fuels 20

2.3.1 Carbon monoxide emission from the fuels 25

2.3.2 Nitrogen dioxide emission 26

2.3.3 Sulphur dioxide emission 29

2.3.4 Formaldehyde emission 29

2.3.5 Suspended particulate matter emission 29

2.3.6 Polycyclic aromatic hydrocarbons 32

2.4 Effect of pollutant on health 32

REFERENCES 33

CHAPTER -3 MATERIALS AND METHODS 49-74

3.1 Experimental protocol 45

3.1 a Experimental house 46

3.2 Stoves 46

3.2.1 Description of biofuel stoves 46

3.2.2	Cooking appliances using conventional fuels	52
3.3	Biofuels and conventional fuels	52
3.4	Thermal performance evaluation of stoves	55
3.5	Environmental performance of Stoves	58
3.6	Calculation of emission factors	62
3.7	Conversion of biomass to charcoal	66
	REFERENCES	71
	CHAPTER -4 IMPACT ON AIR QUALITY OF BIOMASS COMBUSTION AND CONVERSION	75-223
4.1	Fuel analysis	75
4.1.1	Ambient air quality	80
4.2	Performance of the stoves	80
4.2.1	Thermal performance of the traditional stove	80
4.2.2	Environmental performance of the traditional stove	87
4.2.3	Carbon monoxide concentration in indoor Environmental from different fuels use in traditional stove	105
4.2.4	Thermal performance of Sugam-II stove	110
4.2.5	Flue gas analysis	110
4.2.6	Environmental performance of Sugam-II stove	125
4.2.7	Carbon monoxide concentration in indoor environment during operation of Sugam-II	142
4.2.8	Thermal performance of Priyagni stove	150
4.2.9	Environmental performance of Priyagni stove	153
4.2.10	Carbon monoxide concentration in indoor environment during operation of Priyagni	159
4.2.11	Respirable particulate matter from the biomass stove	164
4.3.1	Combustible and benzene soluble matter in particulate matter	165
4.3.2	Spectral studies of Polycyclic Aromatic	168

Hydrocarbons extracted from SPM	
4.3.3 Polycyclic Aromatic Hydrocarbons during stove operation and for 24hr. sample	168
4.3.4 Emission factor of biomass stoves	179
4.4 Charcoal stove	198
4.4.1 Thermal performance of charcoal stove	198
4.4.2. Environmental performance of charcoal stove	198
4.4.3 Performance of biogas stove	205
4.4.4 Combustible and benzene soluble in particulate matter of charcoal and biogas stove	210
4.4.5 Benzo (a) pyrene concentration in the indoor environment from charcoal and biogas stove	212
4.4.6 Emission factor of charcoal and biogas stove	214
4.5 Biomass conversion to charcoal	214
REFERENCES	217
CHAPTER - 5 POLLUTION FROM COOKING DEVICES USING CONVENTIONAL FUELS	222-249
5.1 Pollution from conventional fuel cooking devices	222
5.1.1 Environmental performance of coal stove	222
5.1.2 Environmental performance of kerosene stove	228
5.1.3 Environmental performance of LPG stove	233
5.2 Combustibles and benzene solubles in the particulate matter collected from conventional fuels	237
5.3 Polycyclic Aromatic Hydrocarbons in the indoor environment from conventional fuels	240
5..4 Emission factor of conventional fuel stoves	243
REFERENCES	248
CHAPTER -6 INDOOR POLLUTION MANAGEMENT AND CONCLUSIONS	250-266
6.1 Use of efficient stoves	251
6.2 Fuel conversion and substitution	255

6.3	Use of natural gas	255
6.4	Proper kitchen design	255
6.5	Use of solar energy	258
6.6	Conclusions	260
6.7	Recommendations for further future work	264
