

HIGHER ORDER ELASTIC CONSTANTS AND THEIR
EFFECT ON PROPAGATION OF ELASTIC WAVES

Parna Nand Gupta

Thesis submitted to Indian Institute of Technology, Delhi
for partial fulfilment of the Degree of
Doctor of Philosophy

1972

ACKNOWLEDGEMENTS

The author expresses his deepest sense of gratitude and indebtedness to Dr. S. S. Mathur, Assistant Professor, Department of Physics, Indian Institute of Technology, Delhi for suggesting the problem, constant encouragement and expert guidance throughout the duration of the work.

Thanks are due to Shri T. N. Gupta for efficient typing of the thesis.

Contents

Chapter		Page
I	Introduction	4
II	Anharmonicity - a Review	18
III	F. C. C. Metallic Crystals	26
	3.1 Higher Order Elastic Constants	26
	3.2 Symmetry Properties of F. C. C. lattice	32
	3.3 Derivation of the Coupling Parameters	34
	3.4 Derivation of Expressions for HOEC: Method of Homogeneous Deformation	43
	3.5 Evaluation of Force Constants using Morse Potential	52
	3.6 Pressure Derivatives of Elastic Constants	58
	3.7 Anisotropy	59
	3.8 Debye Temperature	60
	3.9 Nonlinear Length	60
	3.10 Elastic Wave Attenuation	62
	3.11 Results, Discussions and Conclusions	71
IV	Ferromagnetic Solids	95
	4.1 Introduction	96
	4.2 Derivation of Expressions for effective HOEC for ferromagnetic solids	96
	4.3 Derivation of Expressions for effective HOEC of Ferromagnetic Semiconductors	106
	4.4 Results, Discussions and Conclusions	110

V	Ferroelectric Solids	113
	5.1 Introduction	113
	5.2 Derivation for expressions for HOEC	115
	5.3 Results, Discussions and Conclusions	130
