CERTIFICATE

This is to certify that the thesis entitled "***Studies on Lipase Catalyzed Esterification Reactions in Microaqueous Environment***", being submitted by ***Jasmedh Kaur*** to the Indian Institute of Technology, Delhi, for the award of Degree of Doctor of Philosophy, has been prepared under my supervision and guidance in conformity with the rules and regulations of Indian Institute of Technology, Delhi. The research report and results presented in the thesis have not been submitted to any other University or Institute for the award of any other degree or diploma.

Dr. Subhash Chand
Professor
Deptt. of Biochemical Engg.
and Biotechnology,
Indian Institute of Technology,
NEW DELHI - 110016

ACKNOWLEDGEMENT

It is a great pleasure to express my sincere gratitude and regards to my project supervisor *Prof Subhash Chand* for his inspiration, guidance and keen interest. His cooperation and valuable suggestions helped me to complete the project in time. I am indebted to *Prof Bo Mattiasson* for his useful discussions and suggestions during my research work in Sweden. My sincere thanks to

- *Prof V S Bisaria*, Head of Dept. for providing all the laboratory facilities to complete my research work.

All the faculty members of the department who were invariably cooperative and had shown keen interest in my work.

Mr V K Ghosh, Mrs Renu Sethi, Mr M Anand, Mr S P Rana, Mr J A Khan, Mr Kishan, Mr D V Sharma, Mr Bhagwan Singh, Mr G P Yadav and Mr Babu for their technical assistance.

Mrs Neera Verma, Mrs Sunita Verma, Mr K S Chawla, Mr S K Khurana, Mr S Anand and Mr C P Kalra for their sincere cooperation.

Mr Sunil Dutt, Mr Negi, Mr Pitambar, Mr Mukundan and Mr Ramesh for their assistance in different laboratories.

I am thankful to my research colleagues *Monica, Jaspreet, Malini, Sadhna and Boominathan* for their charming company and constant encouragement in my work.

I owe much to *Ernst Wehtje, Patrick, Asa, Anna, Angie, Nandita, Peter, Thomas and Ingemar* for providing me home like environment in Univ. of Lund during my stay in Sweden.

Hemant Deoliya for their skilful help in word processing of this document.

I am greatly indebted to my parents for bearing all my burdens so that I can dedicate to my work especially during thesis writing. Finally, I wish to thank my husband without whose moral support and encouragement, I would not have completed my research.

Jasmedh Kaur

CONTENTS

	Page No.	
CHAPTER - 1	INTRODUCTION AND OBJECTIVES	1-8
1.1	Introduction	1
1.2	Objectives	7
CHAPTER - 2	LITERATURE REVIEW	9-49
2.1	Structure and General Characteristics of Lipases	9
2.2	Physicochemical Properties	11
2.3	Activation of Lipases by Interfaces	12
2.4	Reactions catalyzed by lipases	13
	2.4.1 Hydrolysis reactions	14
	2.4.2 Ester synthesis (esterification reactions)	15
	2.4.3 Transesterification (interesterification) reactions	17
2.5	Specificity of Lipases	23
2.6	Kinetics and Mechanism of Lipase Catalyzed Reactions	27
2.7	Modes of Enzymatic Catalysis	32
	2.7.1 Aqueous - organic two phase system	33
	2.7.2 Enzymes in reverse micelles	34
	2.7.3 Enzymes in microaqueous solvents	35
2.8	Factors Affecting Enzymatic Catalysis in Microaqueous Medium	36
	2.8.1 Role and choice of support	36
	2.8.2 Solvent	39
	2.8.3 Role of water	44

CHAPTER - 3	MATERIALS AND METHODS	50-61
3.1	Materials	50
3.2	Methods	51
3.2.1	Immobilization of lipases	51
3.2.2	Protein activity assay	51
3.2.3	Hydrolytic activity assay	52
3.2.4	Esterification activity	53
3.2.5	Water activity equilibration	53
3.2.6	Reaction kinetics	54
3.2.7	Reactor configurations for controlling water activity	55
3.2.8	Water transfer studies	58
3.2.8.1	Small scale reactor studies	58
3.2.8.2	Transfer studies with large scale reactor	58
3.2.8.3	Water transfer studies in simulated water producing system	59
3.2.9	Performance of silicone tubing system in different reactor configurations	59
3.2.9.1	Batch reactor	59
3.2.9.2	Continuous stirred tank reactor (CSTR)	60
3.2.9.3	Packed flow reactor (PFR)	60
3.2.10	Analytical procedure	61
CHAPTER - 4	RESULTS AND DISCUSSION	62-129
4.1	Screening of Various Lipases	62
4.2	Choice of Suitable Support for Immobilization	64
4.2.1	Pretreatment of the support with solvent	70
4.2.2	Effect of enzyme loading	71
4.2.3	Effect of immobilization on catalytic characteristics of soluble and immobilized forms	73
4.3	Reaction Kinetics	76
4.3.1	Effect of enzyme and substrate concentration	78
4.3.2	Effect of fatty acid chain length	81

4.33	Effect of water content (water activity)	83
4.34	Effect of water activity on kinetic constants	86
4.4	Effect of Controlling Water Activity	89
4.5	Mass Transfer Studies	93
4.5.1	Swelling behaviour of tubings in organic solvents	94
4.5.2	Determination of water diffusion coefficients	95
4.5.3	Effect of tube length	106
4.5.4	Effect of stirring	107
4.5.5	Water transfer under simulated reaction conditions	107
4.6	Applications in Enzymatic Reactions	110
4.6.1	Batch reactor	110
4.6.2	Continuous Stirred Tank Reactor (CSTR)	117
4.6.3	Tubular reactor	121
4.6.4	Comparison of the different reactors	125
4.6.5	Reactions without solvent	126
4.6.5.1	Batch reactions in pure substrate solution	126
4.6.5.2	Reactions using tubular reactor and pure substrate solutions	129
