

**SOME ASPECTS OF THE CHEMISTRY
OF
URANYL SELENITES**

**A THESIS SUBMITTED TO THE
INDIAN INSTITUTE OF TECHNOLOGY, NEW DELHI
FOR THE DEGREE OF
DOCTOR OF PHILOSOPHY
IN CHEMISTRY**

**V. P. VERMA
DEPARTMENT OF CHEMISTRY
FEBRUARY, 1974.**

C E R T I F I C A T E

This is to certify that the thesis entitled "Some Aspects of the Chemistry of Uranyl Selenites", being submitted by Mr.V.P.Verma to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Chemistry, is a record of bonafide research work carried out by him. Mr.V.P.Verma has worked under my guidance and supervision and has fulfilled the requirements for the submission of this thesis, which to my knowledge, has reached the requisite standard.

The results contained in this thesis have not been submitted, in part or in full, to any other University or Institute for the award of any degree or diploma.

Thesis Supervisor

(R.D.Dua)
Head of Chemistry Department,
Indian Institute of Technology,
Hauz Khas, New Delhi-110029.

A C K N O W L E D G M E N T

It is my profound pleasure and privilege to put on record my deep sense of gratitude to Dr.B.L.Khandelwal, Assistant Professor of Chemistry Department, Indian Institute of Technology, for his able guidance, unsparing and ever available help. In fact, but for his help and painstaking supervision and inspiring discussions this work would have never attained this stage.

I take this opportunity to thank Professor R.D.Dua, Head of the Department, not only for providing laboratory facilities but also for his allout help whenever and wherever required. Professor Dua helped me in accomplishing this project by recommending my name for International Seminars in Chemistry and Chemical Engineering(West Germany) where I could do certain instrumental studies which would have been rather difficult here.

It is indeed a pleasure to acknowledge the help and assistance received from various quarters, especially from Professor E.Fitzer, Dr.W.Weisweiler Karlsruhe University for permitting the use of DTA, Dr.(Miss) G.Weitz Mineralogy Department of Karlsruhe University, for help in getting X-ray diffraction patterns, and Miss E.Braendel for preparing X-ray diffraction prints. I am grateful to Dr.B.P.Straughan of

the University of Newcastle Upon Tyne, U.K. for permitting the use of infrared and Raman spectrometers, Mrs.Linda Cook for recording Raman spectra and Mr.B.D.Phloria of Chemistry Department for recording infrared and visible absorption spectra.

My special thanks are due to Miss K.Raina for reading proofs and manuscript critically.

I acknowledge with thanks for all sorts of assistance and encouragements from my parents, elders, relatives and my wife for her consolations which I required quite often.

Last, surely not the least, my thanks are due to Mr.T.R.Sharma for expert execution of the typing work.

V.Verma
(V.P.VERMA)

<u>CHAPTER-I</u>	Introduction	1-27
1.1	Uranyl Ion and its Tendency to form Complexes	1
1.2	Aqueous Chemistry of Uranyl ion	4
1.3	Spectroscopy of Uranyl Compounds	5
1.4	Uranyl Complexes Containing $\text{MO}_3^{\text{n-}}$ Ligands.	9
1.5	Uranyl Complexes with other Ligands	15
	Scope of the Present Work	18
	References	19
<u>CHAPTER-II</u>	Electrometric Studies	28-54
2.1	Introduction	28
2.2	Experimental	38
2.3	Results and Discussion	39
	Summary	49
	References	51
<u>CHAPTER-III</u>	Liquid-Liquid Distribution (Solvent Extraction) and Spectrophotometric Studies	55-80
3.1	Introduction	55
3.2	Experimental	63
3.3	Results and Discussion	64
	Summary	76
	References	77

<u>CHAPTER-IV</u>	Selenito Uranylates	81-124
4.1	Introduction	81
4.2	Techniques used in the Study of the Compounds	88
4.3	Experimental	96
4.4	Results and Discussion	102
	Summary	118
	References	119
<u>CHAPTER-V</u>	Hydroxo Selenito Uranylates	125-145
5.1	Introduction	125
5.2	Experimental	131
5.3	Results and Discussion	133
	Summary	143
	References	144
<u>CHAPTER-VI</u>	Resume and Scope	146-151
