

A THESIS ON
DYNAMICS OF NECKING

By

NARINDER KUMAR GUPTA
Department of Applied Mechanics
Indian Institute of Technology
Delhi

Submitted to Indian Institute of Technology, Delhi
for award of the degree of Doctor of Philosophy
in Applied Mechanics
1972

CERTIFICATE

This is to certify that the thesis entitled DYNAMICS OF NECKING by Shri Narinder Kumar Gupta has been prepared under my supervision and has attained a standard required for a Ph.D. degree of the Institute. The research report and results presented in the thesis have not been submitted for any other degree in any university.

(B. Karunes)

Professor of Applied Mechanics,
Indian Institute of Technology, Delhi.

Dated: 28.9.1972.

ACKNOWLEDGEMENTS

I am extremely grateful to Professor B. Karunes, Department of Applied Mechanics, Indian Institute of Technology, Delhi, for his valuable guidance and encouragement throughout this work.

I am grateful to the staff of Strength of Materials laboratory and Workshop, Department of Applied Mechanics, for their help during my experimental work.

I am grateful to the staff of Computer Centre, Indian Institute of Technology, Delhi, for their cooperation during the computations.

I feel pleasure in thanking Shri Raj Kumar for his excellent typing.

Narinder K. Gupta

Date: 28.9.1972.

(Narinder Kumar Gupta)
Department of Applied Mechanics,
Indian Institute of Technology,
Hauz Khas, Delhi.

CONTENTS

I	INTRODUCTION	1
	1.1 Necking phenomena	1
	1.2 Brief resume of previous work	3
	1.3 The present attempt	6
II	FORMULATION OF THE PROBLEM FOR THE ANALYSIS	15
	2.1 Physical problem	15
	2.2 The equation of motion	16
	2.3 Compatibility equation	19
	2.4 Stress strain relation	21
	2.5 Stress strain relation after strain hardening	23
III	METHOD OF SOLUTION AND NUMERICAL COMPUTATION	26
	3.1 Condition at first instability	26
	3.2 The first phase of deformation	29
	3.3 Successive phases of deformation	32
	3.4 A note on stress strain relation	36
IV	EXPERIMENTAL AND THEORETICAL RESULTS	41
	4.1 The stress strain relation	41
	4.2 Neck profiles of Aluminium specimens	51
	4.3 Neck profiles of Copper specimens	55

4.4	Neck profiles for Brass specimens	58
4.5	Neck profiles for L.C. Steel specimens	61
4.6	Neck profiles for specimens of varying diameters	64
V	GENERAL DISCUSSIONS AND CONCLUSIONS	76
5.1	On the assumption of plane waves	76
5.2	On the assumption of stress freeze	78
5.3	On the assumption of successive strain hardening	82
5.4	Concluding remarks	83
	APPENDICES	87
