

# STUDIES OF CHARGE CARRIER TRANSPORT IN SOME ORGANIC MOLECULAR CRYSTALS

by  
**S. RAVINDRA NATH**

Thesis submitted to the  
Indian Institute of Technology, Delhi  
for the award of the degree of  
**DOCTOR OF PHILOSOPHY**

**Department of Physics**  
INDIAN INSTITUTE OF TECHNOLOGY, DELHI

1984

## CERTIFICATE

This is to certify that the thesis entitled "Studies of Charge Carrier Transport in Some Organic Molecular Crystals", being submitted by Mr. S. RAVINDRA NATH to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Physics is a record of bona fide research work carried out by him. Mr. S. RAVINDRA NATH has worked under my guidance and supervision and has fulfilled the requirements for the submission of this thesis.

The results obtained in this thesis have not been submitted, in part or full, to any other university or institution for the award of any degree or diploma.

(Dr. S.C. MATHUR)

Professor of Physics  
Indian Institute of Technology, Delhi,  
New Delhi 110 016

## ACKNOWLEDGEMENTS

I would like to acknowledge with gratitude the assistance and encouragement of very many people during the course of work, culminating in this manuscript.

First and foremost to my supervisor, Prof. S.C. Mathur, who has been a constant source of helpful understanding and stimulating guidance throughout the course of the work.

I would like to thank Dr. D.C. Dube for all the help and encouragement I have received from him.

I would also like to thank Prof. P.K.C. Pillai, Head of the Physics Department and Dr. N.K. Bansal, Centre for Energy Studies, for providing me fellowship for part of the period, which enabled me to complete this work.

The present work could hardly have been possible without the assistance and cooperation on the part of a large number of colleagues and friends, especially, Dr. A.K. Batra, Dr. J.P.S. Chauhan, Dr. A.D. Sharma, Dr. Keya Dhar, Mr. Rakesh Kumar, Mr. B.K. Sharma, Dr. C.P.S. Tomar, Mr. G.D. Sharma, Dr. K.S. Reddy, Mr. A.R. Laxman and Mr. Rama Rao.

My thanks are also due to various staff at our Computer Centre, Workshop, I.D.D.C. and Glass Blowing Workshop.

It is a pleasure to thank Mr. S.L. Aneja for neat typing of the manuscript and Mr. R.N. Kapoor, Mr. Jagdish

and Mr. N.S. Gupta for neat tracing of the figures.

Finally I owe a great debt of gratitude to my parents for setting me on the path towards intellectual pursuits and to my brother and sister for their constant encouragement.

*S. Ravindra Nath*

(S. RAVINDRA NATH)

# CONTENTS

CHAPTER		Page
I	GENERAL INTRODUCTION AND SYNOPSIS OF THE THESIS ..	1-5
II	REVIEW OF PRESENT STATUS OF UNDERSTANDING OF ELECTRONIC PROCESSES IN ORGANIC SEMI-CONDUCTORS WITH PARTICULAR REFERENCE TO ORGANIC MOLECULAR CRYSTALS	6-43
	2.1 Introduction ..	6
	2.2 Aromatic hydrocarbons: Model compounds of organic semiconductors ..	7
	2.3 Electronic states in organic molecular crystals ..	7
	2.4 Trapping states in organic molecular crystals ..	12
	2.5 General concepts of electrical conduction ..	15
	2.6 Charge carrier generation ..	18
	2.7 Field dependent effects ..	23
	2.8 Charge transport mechanism in organic semiconductors ..	31
III	EXPERIMENTAL TECHNIQUES AND METHOD OF THEORETICAL BAND STRUCTURE CALCULATIONS ..	44-71
	3.1 Introduction ..	44
	3.2 Purification methods ..	44
	3.3 Crystal growth ..	50
	3.4 Sample preparation ..	53
	3.5 Measurement techniques ..	54
	3.6 Method of band structure calculation ..	62
