

PROGRESSIVE CHANGES IN MATERIAL PARAMETERS  
DURING FATIGUE

by

VUPPULURI MAHARAJ KUMAR

Thesis submitted to the  
Indian Institute of Technology, Delhi  
for the award of the degree of  
DOCTOR OF PHILOSOPHY

Department of Applied Mechanics  
Indian Institute of Technology, Delhi

December, 1974.

CERTIFICATE

This is to certify that the thesis entitled  
'PROGRESSIVE CHANGES IN MATERIAL PARAMETERS DURING FATIGUE'  
submitted by Mr. Vuppuluri Maharaj Kumar has been prepared  
under my supervision in conformity to the rules and  
regulations of the Indian Institute of Technology, Delhi.  
I further certify that the thesis has attained a standard  
required for a Ph.D. degree of the Institute. The research  
report and results presented in the thesis have not been  
submitted for any degree in any University.

( B. KARUNES )

Head and Professor,  
Department of Applied Mechanics,  
Indian Institute of Technology, Delhi.

## ACKNOWLEDGEMENTS

The author is highly indebted to Prof. B. Karunes, Head of the Department of Applied Mechanics, Indian Institute of Technology, Delhi, for the kind guidance and help that the author received throughout the project. The project is funded by the I.I.T., Delhi for which the author expresses his gratitude to the Director, Prof. N.M. Swani. Particular mention must be made of Prof. R.C. Malhotra, Prof. V. Raghavan, Dr. N.K. Gupta and Dr. P.C. Dumir who had always been encouraging and helping the author in many ways. The author is also grateful to all the laboratory and workshop staff of the department, and the staff of the Computer Centre, who helped him at different stages during this project. Thanks are also due to Shri S.K. Mehra for typing the manuscript.

*V. M. Kumar*

## TABLE OF CONTENTS

Acknowledgements	iii
List of Figures	iv
List of Tables	vi
Table of Contents	vii
List of Symbols	x

## CHAPTERS

1.	THE INTRODUCTION	1 - 14
1.1	Review of Cumulative Damage Theories	2
1.2	Review of Hysteresis Loop Studies	8
1.3	Present Efforts	13
2.	THE PROPOSITION	15 - 25
2.1	Stress-Strain Relations	16
2.2	Ludwik's Relation	18
2.3	Ramberg-Osgood Relation	20
2.4	Nature of Changes of the Parameters	20
2.5	An Analytical Study of Hysteresis	23

3.	THE EXPERIMENTS	26 - 52
3.1	Details of the Apparatus	27
3.2	Specimen Materials	35
3.3	Test Procedure	36
3.4	The Term 'Stress Level'	38
3.5	Analysis of the Observations	39
3.6	The Computations	41
4.	THE RESULTS OF EXPERIMENTS ON COPPER	53 - 69
4.1	Modulus of Elasticity, E	54
4.2	Ludwik's Strength Coefficient, K	54
4.3	Ludwik's Strain Hardening Exponent, n	58
4.4	Ramberg-Osgood Base Stress, $\sigma_0$	58
4.5	Ramberg-Osgood Strain Hardening Coefficient, m	63
4.6	Hysteresis Loops	66
5.	THE RESULTS OF EXPERIMENTS ON ALUMINUM	70 - 85
5.1	Copper versus Aluminum	71
5.2	Modulus of Elasticity, E	71
5.3	Ludwik's Strength Coefficient, K	72
5.4	Ludwik's Strain Hardening Exponent, n	72
5.5	Ramberg-Osgood Base Stress, $\sigma_0$	77
5.6	Ramberg-Osgood Strain Hardening Coefficient, m	77
5.7	Hysteresis Loops	82

6.	THE CLOSURE	86 - 90
6.1	Summary of Results	87
6.2	Major Observations	89
6.3	Closing Remarks	89
	THE APPENDIXES	91 - 103
A.	Experimental Results - Copper	92
B.	Experimental Results - Aluminum	95
C.	Computer Program	98
	THE AUTHOR INDEX	104 - 106
