

REVERSIBLE OCCLUSION OF THE
VAS DEFERENS

Abdul Mateen Ahmed
Biomedical Engineering Division

Thesis submitted to the Indian Institute of Technology, Delhi,
in partial fulfilment of the requirements for the degree of
Doctor of Philosophy

Department of Applied Mechanics
Indian Institute of Technology, Delhi

1975

CERTIFICATE

This is to certify that the thesis entitled "REVERSIBLE OCCLUSION OF THE VAS DEFERENS" being submitted by Mr. Abdul Mateen Ahmed to the Indian Institute of Technology, Delhi, in partial fulfilment for the award of the Degree of Doctor of Philosophy of the Indian Institute of Technology, Delhi, is a record of bonafide research work carried out by him under my supervision and guidance for the last three years and to my knowledge it has reached the standard fulfilling the requirement of the regulations relating to the degree.

The results contained in this thesis have not been submitted in part or in full to any other University or Institute for the award of any degree or diploma.

(S.K. GUHA)
Professor
Biomedical Engineering Division
Indian Institute of Technology
Hauz Khas, New Delhi-110029.

ACKNOWLEDGEMENTS

It gives me great pleasure to thank my research supervisor Professor S.K. Guha, for his constant help, guidance and inspiration. I have learnt a lot during my discussions with him and this work, as it stands today, is due to his endeavour and effort and I am sincerely grateful to him.

I would also like to thank my colleague Miss Harpreet Kaur for her help with the animal experimentation, some calculations and manuscript correction.

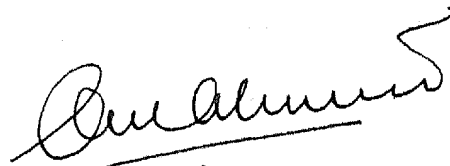

My other colleagues who need special mention and thanks are Miss Sneh Anand, who helped with the drawings and Mr. M.R. Khan for his help with the computer programming.

Thanks are also due to Mr. S.C. Chakravarty for making the devices.

A project of this nature requires help from many departments and I am grateful to the various departments of the Indian Institute of Technology, Delhi and the All India Institute of Medical Sciences, New Delhi, for extending their facilities to me.

I wish to thank all my colleagues and friends who helped with this project in any way.

Last, but not least, I wish to thank Miss Neelam for the excellent job she has done of the typing of this thesis.

(A. MATEEN AHMED)

CONTENTS

		<u>Page</u>
CHAPTER I	INTRODUCTION	1
1.1	Background	1
1.2	Bibliographical Review	2
1.3	Need and direction of the present work	8
CHAPTER II	MOVABLE INTRAVASAL PLUG	11
2.1	Problem Formulation	11
2.2	Pressure on the bead	15
2.3	Background on spermatozoa dynamics	18
2.4	Viscous forces	21
2.5	Analysis of reaction forces on the head	26
2.6	Analysis of friction and drag forces	28
2.7	Long term effects	37
2.8	Total energy calculations	39
2.9	Discussions	40
	Summary of the chapter	42
CHAPTER III	EXTRAVASAL REVERSIBLE OCCLUSION DEVICE	43
3.1	Introduction	43
3.2	Spermatozoa transport in the vas deferens	47
3.3	Experimental study	51
3.4	Transport parameters	52
3.5	Direct observations	56
3.6	Interpretation of transport studies	59
3.7	Form of the extravasal device	59
3.8	Tightness of knots	62
3.9	Trials for tube dimensions	65
3.10	Trials for the study of material interfaces	65
3.11	Identification of causes for failure	69

CHAPTER IV	ASSESSMENT OF DEVICES	72
4.1	Evaluation of device	72
4.2	Experimental trials	74
4.3	Design modifications	76
4.4	Further experimental trials	79
CHAPTER V	DISCUSSIONS	82
