SOME ASPECTS

OF

CHEMISTRY OF TELLURIUM COMPOUNDS

BY

KRISHNA RAINA

THESIS SUBMITTED TO THE INDIAN INSTITUTE

OF TECHNOLOGY, DELHI

FOR

THE AWARD OF THE DEGREE OF DOCTOR OF PHILOSOPHY.

DEPARTMENT OF CHEMISTRY,

INDIAN INSTITUTE OF TECHNOLOGY, DELHI

DECEMBER, 1974.

C E R T I F I C A T E

This is to certify that the thesis entitled "Some Aspects of the Chemistry of Tellurium Compounds", being submitted by Miss Krishna Raina to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Chemistry, is a record of bonafide research work carried out by her. Miss Krishna Raina has worked under my guidance and supervision and has fulfilled the requirements for the submission of this thesis, which to my knowledge, has reached the requisite standard.

The results contained in this thesis have not been submitted, in part or in full, to any other University or Institute for the award of any degree or diploma.

(B.L. Khandelwal)
Thesis Supervisor

(R.D. Dua)
Head of Chemistry Department
Indian Institute of Technology,
Hauz Khas, New Delhi-110029,

A C K N O W L E D G E M E N T

It is my profound pleasure and privilege to put on record my deep sense of gratitude to Dr. B.L. Khandelwal, Assistant Professor of Chemistry Department, Indian Institute of Technology, for his able guidance, unsparing and ever available help. In fact, but for his help and painstaking supervision and inspiring discussions this work would have never attained this stage.

I am highly thankful to Professor R.D. Dua, Head of the Chemistry Department, not only for providing all the facilities which I needed for this work, but also encouraging me from time to time.

I am grateful to Mr. J.W. Akitt of the University of Leeds, U.K., for his help in getting n.m.r. spectra recorded, and Professor R.C. Mehrotra of Rajasthan University, now Vice-chancellor of Delhi University, for his help in getting molecular weight data. Thanks are also due to Mr. B.D. Phuloria for recording infrared spectra and to C.D.R.I., Lucknow for estimating carbon and hydrogen contents of the compounds.

Last but not the least, my thanks are due to Miss Versha Sharma for executing the task of typing the manuscript with great care and thoroughness.

Krishna Raina

(Krishna Raina)

CHAPTER I

	Introduction	1-35
1.1	Tellurium(IV) Halides and their Structure	1
1.2	Acceptor Properties of Tellurium(IV)Halides	3
1.3	Organotellurium Compounds	16
1.4	Application of Tellurium and its Compounds	23
	References	27-35

CHAPTER II

	Liquid-Liquid Distribution (Solvent Extraction) and Spectrophotometric Studies	36-57
2.1	Introduction	36
2.2	Experimental	44
2.3	Results and Discussion	46
2.4	Summary	54
	References	56-57

CHAPTER III

	Aminoaryltellurium Trichlorides	58-87
3.1	Introduction	58
3.2	Techniques used in the Study of Compounds	58
3.3	Experimental	63
3.4	Results and Discussion	70
3.5	Summary	81
	References	83-87

CHAPTER IV

	Reactionsof Aminoaryltellurium Trichlorides	88-105
4.1	Introduction	88
4.2	Study of the Reaction of Aminoaryltellurium Trichloride	91
4.3	Adduct Formation	91
4.4	Halogen Exchange	97
4.5	Addition to Carbon-Carbon Double Bond	101
4.6	Reduction with Thiourea	101
4.7	Summary	103
	References	104-105

CHAPTER V

	Chlorotellurium Compounds of Aryl Ethers and Substituted Phenols	106-127
5.1	Introduction	106
5.2	Experimental	108
5.3	Results and Discussion	113
5.4	Summary	125
	References	126-127

CHAPTER VI

	Resume and Further Scope of Work	128-135
