

MOVEMENT AND DISTRIBUTION OF FIBRES
ON A REVOLVING FLAT CARD

A Thesis

submitted for the Degree of
Doctor of Philosophy

by

AMRIK SINGH

Textile Technology Department
Indian Institute of Technology
New Delhi-29

October, 1969.

ACKNOWLEDGEMENTS

The author wishes to express his sincere gratitude to Prof. N.M.Swani, Head of Textile Technology Department, Indian Institute of Technology, Delhi, for his continued encouragement and invaluable guidance throughout the course of this work.

Thanks are also due to:

Prof. G. Raes, Director, Lab. de Meulemeester, Gent, Belgium, in whose association this work found its origin and for his guidance in the initial stages of the work.

Professor P. Grosberg (Leeds University), Visiting Professor at the Indian Institute of Technology, Delhi, for his invaluable discussions and suggestions during his stay at I.I.T., Delhi.

The Director, ATIRA, Ahmedabad, for the permission to conduct some experiments at the ATIRA laboratories.

Shri S.N.Bhaduri, Senior Deputy Director, ATIRA, and Head of Mechanical Processing Division, for his kind co-operation in conducting experiments at ATIRA laboratories.

Management of D.C.M. Group of Mills for extending facilities to conduct some experiments in the Delhi Cloth

Mills Limited and the Swatantra Bharat Mills Limited.

Prof. S.G.Mohanty and Dr. N.S.Kambo, for interesting and useful discussions regarding Markov chains and stochastic processes.

Dr. Y.P.Khanna, Pool Officer, for translating a few German papers into English.

Prof. A.K.Sengupta and other colleagues in the Textile Technology Department, for interesting discussions.

Shri G. D. Sastry for the typing assistance.

Amish S. B.

INDEX

	<u>Page</u>
1. INTRODUCTION	1
2. GENERAL	3
2.1 Concept of the Stochastic Process and Markov Chains	11
3. DISTRIBUTION AND MOVEMENT OF FIBRES ON A REVOLVING FLAT CARD	19
3.1 Significance of Doffer Action	20
3.2 Significance of Flat Action	21
3.3 Concept of Total Carding Time	23
3.4 Case of a Card without Flats	24
3.5 Movement of Fibres on a Conventional Card	32
3.6 Fibre Load on the Working Surfaces in Various States of Carding	39
3.7 Probability P_{ij}	41
3.8 Movement of Fibres in the Flat Region	42
4. EXPERIMENTAL	48
4.1 THEORY OF EXPERIMENT	48
4.1.1 Introduction	48
4.1.2 Earlier work	49
4.1.3 Present problem	55
4.1.4 Determination of P_{45}	57
4.1.5 Determination of P_{12}/P_{24}	66
4.1.6 Measurement of average total carding time per fibre by tracer fibre technique	72

4.2	EXPERIMENTAL VERIFICATION OF THE CONCEPT OF CARDING TIME	76
4.2.1	Effect of flat speed and doffer speed on Q_t'	78
4.2.2	Effect of flat speed and doffer speed on P_{45} , P_{12}/P_{24} and carding index	81
4.2.3	Effect of flat speed and doffer speed on t_r , t_d and T_c	84
4.2.4	Effect of flat speed and doffer speed on T_{cf}	87
4.2.5	Relationship between T_{cf} and T_c	90
5.	EFFECT OF CARDING PARAMETERS ON THE MOVEMENT OF FIBRES THROUGH THE CARD	94
5.1	Experimental Plan	95
5.2	Results	98
5.2.1	Effect of flat speed and doffer speed on carding time	98
5.2.2	Cylinder speed	99
5.2.3	Flat setting	104
5.2.4	Card clothing	106
5.2.5	Sliver weight	108
6.	CARDING TIME AND CARDING QUALITY	110
6.1	Tensile Properties of Card Sliver	112
6.2	Yarn Properties	117
7.	DISCUSSIONS	120

7.1 Loading of Cylinder and Flats	121
7.2 Working of Flats	124
8. SUMMARY AND CONCLUSIONS	129
LITERATURE CITED	134
APPENDIX I	
APPENDIX II
