

TRANSPORT PHENOMENON OF THE OVIDUCT

Sneh Anand  
Biomedical Engineering Division

Thesis submitted to the Indian Institute of Technology, Delhi  
for the award of the degree of  
Doctor of Philosophy

Department of Electrical Engineering  
Indian Institute of Technology, Delhi

· 1976

CERTIFICATE

This is to certify that the thesis entitled "TRANSPORT PHENOMENON OF THE OVIDUCT" being submitted by Miss Sneh Anand to the Indian Institute of Technology, Delhi, for the award of the Degree of Doctor of Philosophy of the Indian Institute of Technology, Delhi, is a record of bonafide research work carried out by her under my supervision and guidance for the last three years and to my knowledge it has reached the standard fulfilling the requirement of the regulations relating to the degree.

The results contained in this thesis have not been submitted in part or in full to any other University or Institute for the award of any degree or diploma.

( S.K. GUHA )  
Professor

Biomedical Engineering Division  
Indian Institute of Technology  
Hauz Khas, New Delhi-110029.

## ACKNOWLEDGEMENTS

It is a pleasure to have the opportunity to express my gratitude to my supervisor Prof. S.K.Guha for his inspiring guidance and priceless help which made this work possible. I also thank him for his constant encouragement from beginning to end which inculcated in me a spirit of enquiry and sense of devotion.

A special word of appreciation is expressed for Miss Harpreet Kaur and Dr. A.Mateen Ahmed for their enthusiastic and unflinching help in experiments and many other ways; Dr. Santosh K. Verma for the informative discussions on reproductive biology; Miss Sudha Mahajan for her timely help and encouragement from time to time; and Dr. Vimla Menon and Miss Harpreet Kaur for doing the arduous task of proof reading the manuscript.

I wish to express my thanks to the members of the Biomedical Engineering Department, specially Dr. S.N.Tandon, for their cooperation and generous help at numerous occasions.

Mr. T.N. Gupta is gratefully thanked for his cooperative and careful typing of the thesis and Mr. Y.S. Aswal for cyclostyling the same.

Financial support received from the Council of Scientific and Industrial Research and Family

Planning Foundation is gratefully acknowledged.

Last but not the least I am grateful to all those who have helped directly or indirectly throughout the course of this work.

Sneh Anand

## CONTENTS

CHAPTER		Page
I	INTRODUCTION	
	1.1 Background of the problem	1
	1.2 Transport of ovum - A Bibliographical review	6
	1.2.1 Ovum location	7
	1.2.2 Wall activity	12
	1.2.3 Ampullary isthmic junction	18
	1.3 Hypotheses of transport	19
	1.4 Physical principles in transport	22
	Summary	24
II	BIOMECHANICS OF OVUM TRANSPORT	
	2.1 Introduction	26
	2.2 Anatomy of the oviduct	27
	2.3 Identification of possible processes in the transport	30
	2.3.1 Adovarian fluid movement	30
	2.3.2 Ciliary beat	32
	2.3.3 Wall contractions	51
	2.4 Integration of the factors	60
	Summary	62
III	IMPEDANCE TECHNIQUE TO MONITOR THE OVIDUCTAL MOTILITY	
	3.1 Introduction	64
	3.2 Wall displacement measurement	67
	3.3.1 Resistance technique	71
	3.3.2 Volumetric changes	72
	3.3.3 Contact resistance changes	77
	3.3.4 Other technical considerations	84

	3.4	Experimental verification of the validity of the technique	85
	3.4.1	Correlation between a displacement transducer and the resistance technique	85
	3.4.2	Correlation with the muscular activity	88
	3.5	<u>In vivo</u> trials	93
		Summary	95
IV		OVIDUCTAL ACTIVITY IN RELATION TO OVUM TRANSPORT	
	4.1	Objectives	97
	4.2	Instrumental technique	98
	4.3	Experiments	100
	4.3.1	Dual probe simultaneous isthmic and ampullar activity	100
	4.3.2	Variability under control conditions	101
	4.3.3	Changes following ovulation	108
	4.4	Interpretation of the results	112
		Summary	114
V		AMPULLARY ISTHMIC JUNCTION DYNAMICS	
	5.1	Introduction	116
	5.2	Ampullary isthmic junction dynamics	117
	5.3	Contraception study	123
		Summary	130
VI		CONCLUSIONS	
	6.1	Significant contributions	131
	6.2	Limitations and improvements	132
	6.3	Future directions	140
		BIBLIOGRAPHY	142
