

ANALYSIS AND DESIGN OF ROTOR CONTROL OF
WOUND ROTOR INDUCTION MOTOR

BY

M. AYYADURAI

DEPARTMENT OF ELECTRICAL ENGINEERING

THESIS SUBMITTED
IN FULFILMENT OF THE REQUIREMENTS OF
THE DEGREE OF
DOCTOR OF PHILOSOPHY

TO THE
INDIAN INSTITUTE OF TECHNOLOGY, DELHI

APRIL, 1979

DEDICATED TO

MY BELOVED PARENTS AND TO MY AFFECTIONATE

SISTER MUNI

CERTIFICATE

Certified that the thesis entitled, "ANALYSIS AND DESIGN OF ROTOR CONTROL OF WOUND ROTOR INDUCTION MOTOR" which is being submitted by Shri M. Ayyadurai for the award of the Degree of Doctor of Philosophy in Electrical Engineering of the Indian Institute of Technology, Delhi, is a record of student's own work carried out by him under my supervision and guidance. The matter embodied in this dissertation has not been submitted for the award of any other Degree or Diploma.

Date: April 16, 1979

R. AROCKIASAMY

ACKNOWLEDGEMENT

The author is grateful to Professor C.S. Jha for his valuable discussions, suggestions and encouragement during the course of this work. Professor R. Arockiasamy has been a source of inspiration, for the author, throughout the period of this work. The author is indebted to him for his valuable guidance and supervision for the successful completion of this work.

The author wishes to thank Dr. B.P. Singh, Dr. S. Doraipandy and Dr. C.V. Ramakrishnan for the discussions the author had with them which contributed for the improvement of this work.

Thanks are due to the authorities of IIT Delhi for providing the required facilities and to the staff of the Electrical Engineering Department and Computer Centre, for their whole hearted cooperation. Shri P.M. Padmanabhan Nambiar deserves a special word of appreciation and thanks for his typing of this thesis.

The author wishes to record his indebtedness to Professor M. Maria Louis, Principal, Thiagarajar College of Engineering, Madurai, for his encouragement and inspiration which prompted the author to take up the research work. Thanks are due to the Management of Thiagarajar College of Engineering, Madurai, for granting the required leave to the author.

The author's wife, Davamani Devi and other members of his family, who have silently tolerated his disposition during the period of this research programme, deserve his heartfelt gratitude.

M. AYYADURAI

List of Principal Symbols	vii
List of Figures	xiii
List of Tables	xxi
Abstract	xxiv
CHAPTER 1	INTRODUCTION
1.1	Introduction 1
1.2	Statement of Problems 14
1.3	Outline of Various Chapters 17
CHAPTER 2	ANALYSIS AND DESIGN SYNTHESIS TECHNIQUES FOR ROTOR CONTROL SCHEMES 22
2.1	General 23
2.2	Theory of Rotor Control of Wound Rotor Induction Motor Operating from Fixed Voltage and Fixed Frequency Supply 25
2.2.1	Equivalent Circuit 25
2.2.2	Basic Equations 27
2.2.3	Representation of the Performance Circles in the Rotor Impedance Plane 29
2.2.4	Discussion of the Graphical Representation 33
2.3	Development of Constrained Optimization Algorithm for Design Synthesis of Rotor Control Networks 37
2.3.1	Introduction 37
2.3.2	Optimization Problem 39

	Page
2.3.3 Sequential Linear Programming (SQLP)	40
2.3.4 Improved Move Limit Method of Sequential Linear Programming	41
2.4 Computer Program and Flow Chart	45
2.5 Conclusions	48
CHAPTER 3 TORQUE CONTROL NETWORKS AND THEIR DESIGN SYNTHESIS	49
3.1 General	50
3.2 Objective and Constraint Functions for Torque Control Network Design	53
3.2.1 Objective Function	53
3.2.2 Constraint Functions	55
3.3 Constant-Starting-Torque Control Using R-L Networks	57
3.3.1 Introduction	57
3.3.2 Improvements by the use of SQLP Over Graphical Techniques for R-L Network Synthesis	59
3.3.3 Improvements by the use of SQLP Over Other Computer Algorithms for R-L Network Synthesis	68
3.3.4 Choice of R-L Networks for Constant-Starting-Torque Control	80
3.4 R-L-C Networks for Constant-Starting-Torque Control	87
3.4.1 Introduction	87
3.4.2 Performance of R-L-C Networks for Constant Torque Starting	93
3.4.3 Comparison of Parallel Capacitor Scheme with Saturistor Control	102

	Page
3.5 Design Synthesis of Negative Slope/ Drooping Torque-Speed Characteristics Using R-L Networks	110
3.5.1 Introduction	110
3.5.2 R-L Network Performance for Negative Slope Torque-Speed Characteristics	113
3.6 Experimental Verification	115
3.7 Conclusions	117
CHAPTER 4 PLUGGING AND DC DYNAMIC BRAKING OF WOUND ROTOR INDUCTION MOTOR USING OPTIMIZED CONTROL NETWORKS	120
4.1 General	121
4.1.1 Plug Braking	122
4.1.2 DC Dynamic Braking	126
4.2 Fast Braking by Plugging	135
4.2.1 Controlled Capacitor in the Rotor	135
4.2.2 Fixed Optimum Resistance in the Rotor	139
4.2.3 Stepless Control of Resistance in the Rotor	142
4.2.4 R-L-C Braking	143
4.3 Controlled Braking by Plugging	146
4.3.1 Performance of R-L Networks	147
4.3.2 Performance of R-L-C Networks	150
4.4 DC Dynamic Braking	155
4.4.1 Analysis of WRIM with External Rotor Network under DC Dynamic Braking	155
4.4.2 Braking Performance under Slip-rings Shorted	157

	Page
4.4.3 Braking Performance of Different Optimized Network Connections in the Rotor Circuit	159
4.5 Conclusions	168
CHAPTER 5 DISCRETE SPEED OPERATION OF WOUND ROTOR INDUCTION MOTOR	170
5.1 General	171
5.2 Simple Series Schemes for Speed Control	176
5.3 Objective and Constraint Functions for Design Synthesis of Speed Control Networks	177
5.4 Improvement by the use of SQLP over Graphical Method of Parameter Evaluation	179
5.4.1 Shepherd et al's Example	179
5.4.2 Krishna Murty's Example	183
5.4.3 Mathew's Example	187
5.5 Performance of Schemes A-D Synthesised Using Singh's Analytical Method of Parameter Evaluation	191
5.5.1 Analytical Method of Parameter Evaluation	191
5.5.2 Performance of Schemes A-D with Analytically Evaluated Parameters	195
5.6 Improvement by the use of SQLP Over Singh's Analytical Method of Parameter Evaluation	208
5.6.1 Performance of Schemes A-D with Optimized Parameter Values	208
5.6.2 Salient Improvements due to SQLP Synthesis Over Analytical Method	218
5.7 Study of 5-parameter R-L-C Networks for Speed Control	219

	Page
5.8	Experimental Confirmation 224
5.9	Conclusions 224
CHAPTER 6	VARIABLE SPEED OPERATION OF WOUND ROTOR INDUCTION MOTOR WITH HYBRID CONTROL (PASSIVE NETWORK AND THYRISTOR CONVERTER) 227
6.1	General 228
6.2	Steady-State Analysis of the Hybrid Arrangement of R-L Network-Thyristor Bridge Converter in the Rotor Circuit of WRIM 233
6.2.1	System Modelling 233
6.2.2	Analysis of Thyristor Bridge with Source Impedance - Review 236
6.2.3	Analysis of Thyristor Bridge with Source Impedance 238
6.2.4	Closed Form Solution for Two SCR and Three SCR Conductions 243
6.3	Computer Program and Flow Chart 249
6.4	Computation 254
6.4.1	Computation of Rotor Current 254
6.4.2	Computation of Rotor Current Harmonics 254
6.4.3	Computation of Torque 256
6.4.4	Computation of Stator Current 257
6.4.5	Computation of Power factor 261
6.5	Experimental Set Up 262
6.6	Results of Open Loop Control 263
6.7	Performance of the Hybrid Control for Variable Speed Operation 274

	Page
6.7.1 Principle of Operation	274
6.7.2 Transfer Function of Individual Blocks	279
6.7.3 Analysis of the Feedback Control Scheme	285
6.8 Results of Closed Loop Control	288
6.8.1 Stability	290
6.8.2 Step Response (Reference Voltage Change)	290
6.8.3 Step Response (Torque Change)	293
6.8.4 Regulation	298
6.9 Conclusions	302
CHAPTER 7 CONCLUSIONS AND SUGGESTIONS FOR FURTHER WORK	
7.1 General	304
7.2 Main Conclusions	304
7.3 Suggestions for Further Work	315
