

MECHANICAL DYNAMICS OF THE VAS DEFERENS

Harpreet Kaur
Biomedical Engineering Division

Thesis submitted to the Indian Institute of Technology, Delhi
for the award of the degree of
Doctor of Philosophy

Department of Applied Mechanics
Indian Institute of Technology, Delhi

1976

CERTIFICATE

This is to certify that the thesis entitled "MECHANICAL DYNAMICS OF THE VAS DEFERENS" being submitted by Miss Harpreet Kaur to the Indian Institute of Technology, Delhi, for the award of the Degree of Doctor of Philosophy of the Indian Institute of Technology, Delhi, is a record of bonafide research work carried out by her under my supervision and guidance for the last three and a half years and to my knowledge it has reached the standard fulfilling the requirements of the regulations relating to the degree.

The results contained in this thesis have not been submitted in part or in full to any other University or Institute for the award of any degree or diploma.

(S.K. GUHA)
Professor
Biomedical Engineering Division
Indian Institute of Technology
Hauz Khas, New Delhi-110029.

ACKNOWLEDGEMENTS

I wish to take this opportunity to express my deep sense of gratitude to my supervisor Prof.S.K.Guha, not because it is customary to do so, but because I really feel privileged to have worked with him. I am indebted to him for his unreserved help and encouragement and the many lively discussions with him have taken me into the realm of Biomedical Engineering much beyond the problem I was working upon. Without his interest and guidance this work could not have been completed.

I also wish to thank my colleague Dr.A.Mateen Ahmed, in collaboration with whom a large part of this work was carried out, for his help with the experimentation and for being a constant source of encouragement. Miss Sneha Anand, another colleague, has been a source of unfailing support in numerous ways throughout the work and I am very grateful to her.

Dr.R. Natarajan of the Department of Applied Mechanics has been most helpful with the finite element analysis and I am also grateful to him for allowing the use of his computer programmes.

I am very grateful to my parents for being so patient and understanding throughout and to my mother especially, for her help with proof reading the manuscript.

I wish to thank all my colleagues for their constant help throughout the course of this work.

Thanks are also due to Mr.S.C.Chakavarty for fabricating the devices.

I wish to thank Miss Neelam Dhody and Mr.V.P.Sharma for the excellent typing of the thesis and Mr.Y.S.Aswal for taking so much trouble over the cyclostyling.

My thoughts finally turn towards all those unnamed animals, alive or dead, who were used for the various studies. To them I dedicate this thesis.

Harpreet Kaur

CHAPTER-I	INTRODUCTION	
1.1	Background	1
1.2	Bibliographical review	6
1.2.1	Structure	7
1.2.2	Function	12
1.3	Physical Techniques	21
	Summary	23
CHAPTER-II	STRUCTURES - MECHANICS RELATIONSHIP OF THE VAS DEFERENS	
2.1	Reasons for Study	25
2.2	Theoretical Studies	31
2.2.1	Background	31
2.2.2	Problem Formulation	31
2.2.3	Problem Solution	42
2.2.4	Uniform Cross-section	48
2.3	Experimental Studies (Static Conditions)	54
2.3.1	Freezing of Samples	54
2.3.2	Pressure-volume Studies	57
2.4	Experimental Studies (Dynamic Conditions)	60
2.4.1	<u>In vitro</u> Studies	60
2.4.2	<u>In vivo</u> Studies	62
2.5	Interpretation of Results	63
	Summary	69

CHAPTER-III	SPERMATIC FLUID TRANSPORT	
3.1	Background	70
3.2	Transport Mechanics	76
3.2.1	Transport Due to Epididymal Pressure	77
3.2.2	Flow Due to Venturi Suction	82
3.2.3	Elastic Recoil of the Walls	84
3.2.4	Peristalsis	86
3.2.5	Active Wall Contractions	90
3.2.6	Hypothesis for Transport	92
3.3	Comparison of the present theory with Earlier Hypotheses	94
	Summary	95
CHAPTER-IV	SPERMATIC FLUID SUPPLY	
4.1	Introduction	96
4.2	Mechanical Interaction of the Vas Deferens With the Source	97
4.3	Filling Pressure	102
	Summary	118
CHAPTER-V	VAS OCCLUSION DEVICES	
5.1	Background	120
5.2	Post Occlusion Dynamics	122
5.3	Transport Across Intravasal Barrier	124
5.4	Extravasal Device Mechanics	127
5.5.1	Tissue Attachment	132
5.5.2	Silver Enamel Junction	137
5.5.3	Flexible End Tube Devices	139
	Summary	141
CHAPTER-VI	DISCUSSIONS	143
