Indian Institute of Technology, Delhi
New Delhi

ACKNOWLEDGEMENTS

I express my deep sense of gratitude to my research supervisors, Professor P.K.C. Pillai and Dr. R.G. Mendiratta, for suggesting the research problem and providing the necessary laboratory facilities. The scintillating and the stimulating discussions which I had with my supervisors have greatly enriched my knowledge of the field. Without their co-operation this work would not have come to a success.

I offer my sincere thanks to Professor K.M. Bahauddin, Principal, and Dr. M.A. Lonappan, Head, Department of Physics, Calicut Regional Engineering College, Calicut, for sponsoring me for higher studies under the Quality Improvement Programme. My thanks are also due to Dr. R.C. Tyagi of Energy Centre, for his help during the preparation of research papers.

My stay at IIT Delhi campus was made very pleasant and memorable by my friends, Mr. S. Rajagopalan, Dr. K.J. George, Mr. K.P. Mohandas and Dr. Francis S. Xavier. I am personally indebted to them.

I wish to place on record my sincere thanks to Dr. Malti Goel, Dr. Rabinder Nath, Miss Shobha Chandrasekhar, Mr. Mohiuddin Mullah, Mr. B.K. Gupta and all other colleagues in the Electret and Opto-electronic group, for their co-operation during the progress of this work.

I wish to thank Mr. P.M. Padmanabhan Nambiar for the flawless and neat typing. My thanks are also due to Mr. Rajendra Kapoor for preparing the drawings and to Mr. Amar Singh for the neat and efficient cyclostyling of the stencils.

The care and the affection shown by my wife Smt. Sitalakshmi Kolappan and children Chempak Kumar and Priya Pillai, were of great help during the course of the research work.

I.I.T Delhi

List of Tables	xv
CHAPTER I INTRODUCTION	1
1.1 BASIC PHOTOCONDUCTING PROCESSES	3
1.1.1 Time Dependence of Photocurrents : Response Time	6
1.2 PERSISTENT INTERNAL POLARISATION (PIP): PHOTOELECTRET STATE	8
1.2.1 Dark Polarisation and Photo Polarisation	9
1.2.2 Effect of Electric Field	9
1.2.3 Effect of the Intensity of Radiation and the Duration of Polarisation	11
1.2.4 Direction of Polarising Field	12
1.2.5 Wavelength Dependence of Photoelectret State	12
1.2.6 Effect of Temperature	13
1.2.7 Autophotoelectret Effect	13
1.3 PHOTODIELECTRIC EFFECT (PDE)	13
1.4 ELECTROPHOTOGRAPHIC STUDIES	14
1.4.1 Basic Techniques	14
i) Classical electrophotography: xerography	14
