**SUBMITTED TO THE INDIAN INSTITUTE OF TECHNOLOGY,
NEW DELHI, FOR THE AWARD OF THE DEGREE OF**

DOCTOR OF PHILOSOPHY

**CENTRE FOR ATMOSPHERIC AND FLUID SCIENCES
INDIAN INSTITUTE OF TECHNOLOGY, DELHI**

1984

CERTIFICATE

This is to certify that the thesis entitled
'Certain Aspects on Simulation and Prediction of Indian
Summer Monsoon Using FGGE Data', being submitted by
Flight Lieutenant S.C. Madan for the award of the degree
of DOCTOR OF PHILOSOPHY, is a record of the original
bonafide research work carried out by him. He has worked
under our joint guidance and supervision and has fulfilled
the requirements for the submission of this thesis.
The results presented in this thesis have not been submitted
in part or full to any other University or Institute for
award of any degree/diploma.

U.C. Mohanty
(U.C. MOHANTY)
Lecturer
Centre for Atmospheric and
Fluid Sciences,
Indian Institute of Technology,
NEW DELHI.

(S.K. DUBE)
Senior Scientific Officer, I
Centre for Atmospheric and
Fluid Sciences,
Indian Institute of Technology,
NEW DELHI.

ACKNOWLEDGEMENTS

I gratefully acknowledge my gratitudes to the Govt. of India for granting me study leave for two years to enable me to finish this work. My gratitudes are due to the Chief of Air Staff, Vice Chief of Air Staff and all other authorities in the Indian Air Force, particularly, Air Cdr. S. Lakshminarayanan, the Director of Meteorology, who kindly helped me in this regard.

I am also deeply grateful to Air Cdr. S. Lakshminarayan, D. Met., Wg. Cdr. R. S. Chhatwal, DD Met., Wg. Cdr. N. Natarajan, DD Met., Wg. Cdr. R. K. Paliwal, DD Met., Wg. Cdr. V. Sunderasan, Sqn. Ldr. N. K. Mathur and all other colleagues in the Directorate of Meteorology, Air Head Quarters, New Delhi, for providing me immense help and inspiration to undertake this research work.

I express my hearty thanks and gratitudes to Dr. U. C. Mohanty and Dr. S. K. Dube for their painstaking guidance and encouragement throughout this research work.

I am deeply indebted to Prof. M. P. Singh, Head, Centre for Atmospheric and Fluid Sciences (CAFS), for his immense help, unceasing encouragement and some very useful and enlightening suggestions during the course of this work.

My sincere thanks are due to the India Meteorological Department for providing me computer time.

I express my deep gratitudes to ECMWF authorities who provided FGGE level IIIb data and allowed to use the ECMWF model to conduct a few numerical experiments (in order to study the maintenance of Indian Summer Monsoon, the results of which are presented in 6th Chapter of this thesis). Dr. U. C. Mohanty's special help in this regard is warmly acknowledged.

Thanks are also due to all the staff members and research scholars of CAFS and the staff members of the Directorate of Meteorology, IAF, for their help in this work.

My deep gratitudes are also due to my wife, Madhu, but for whose ever endurance, patience and co-operation, I would not have been able to complete this work.

I thank Ms Neelam Dhody for her accurate and meticulous typing of this thesis.

S. C. Madan

CONTENTS

	<u>Page No.</u>
SUMMARY	i-ii
CHAPTER I: INTRODUCTION	1
1.1 Background of the Present Work	2
1.2 Objectives of the Thesis	14
1.3 Brief Outline of the Thesis	14
CHAPTER II: A NUMERICAL METHOD FOR COMPUTING STREAM FUNCTION AND VELOCITY POTENTIAL FROM OBSERVED WIND FIELD	22
2.1 Introduction	23
2.2 Review of Earlier Works	26
2.3 Proposed Method of Study	29
2.4 Numerical Solution	32
2.5 Results	40
2.6 Conclusions Obtained From Incomparision of Various Methods (Method I-V)	48
2.7 Comparison of the Present Method (Method V) With the Spectral Method of Computing ψ and X	53
2.8 Fourier Decomposition of Kinetic Energy of Wind Fields Generated by Method V	59
2.9 Conclusions	67

CHAPTER III;	DYNAMIC INITIALIZATION OF MASS AND VELOCITY FIELDS IN THE TROPICS	69
3.1	Introduction	70
3.2	Review of Some Existing Schemes of Initialization	71
3.3	Method of Initialization Used in This Work	83
3.4	Numerical Experiments	84
3.5	Basic Formulation of the Model	84
3.6	Data	87
3.7	Results	88
3.8	Conclusions	102
CHAPTER IV;	CERTAIN ASPECTS ON THE REALIZATION OF PRIMITIVE EQUATIONS FORECASTING MODEL IN THE LOW LATITUDES	104
4.1	Introduction	105
4.2	Data	108
4.3	Static Initialization	109
4.4	Description of the Model and Numerical Solution Procedure	117
4.5	Numerical Experiments	118
4.6	Conclusions	142
CHAPTER V;	NUMERICAL EXPERIMENTS ON FORECASTING SOME IMPORTANT ASPECTS OF SUMMER MONSOON ACTIVITY	143
5.1	Introduction	144
5.2	Data	149
5.3	Model	149
5.4	Numerical Experiments	149
5.5	Results	150
5.6	Conclusions	167

CHAPTER VI:	MAINTENANCE OF ASIAN SUMMER MONSOON: NUMERICAL EXPERIMENTS WITH A GENERAL CIRCULATION MODEL	169
6.1	Introduction	170
6.2	Model	175
6.3	Data	180
6.4	Numerical Experiments	181
6.5	Results	182
6.6	Conclusions	201
CHAPTER VII:	SUMMARY OF CONCLUSIONS	
7.1	Broad Conclusions	204
7.2	Remarks and Future Plane	207
