

VAPOUR-LIQUID EQUILIBRIUM AND THERMODYNAMIC PROPERTIES  
OF FLUOROCARBON MIXTURES  
USING REDLICH-KWONG EQUATION OF STATE

By  
R. S. AGARWAL

Thesis Submitted to the Indian Institute of Technology, Delhi  
for the award of the Degree of  
DOCTOR OF PHILOSOPHY

DEPARTMENT OF MECHANICAL ENGINEERING  
INDIAN INSTITUTE OF TECHNOLOGY, DELHI

June, 1975

CERTIFICATE

This is to certify that the thesis entitled, "Vapour-Liquid Equilibrium and Thermodynamic Properties of Fluoro-carbon Mixtures Using Redlich-Kwong Equation of State" being submitted by Mr. R.S. Agarwal to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Mechanical Engineering, is a record of bonafide research work carried out by him under my supervision and guidance. To my knowledge it has reached the standard fulfilling the requirements of the regulations relating to the degree.

The matter embodied in this thesis has not been submitted, in part or full, elsewhere for the award of any other degree.

*C.P. Arora*

(Prof. C.P. Arora)  
Supervisor and Head,  
Mechanical Engineering Department,  
Indian Institute of Technology, Delhi,  
New Delhi-110029

## ACKNOWLEDGEMENTS

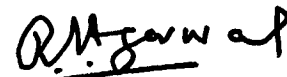

It gives me immense pleasure in expressing my sincere regards and gratitude to Dr.C.P.Arora, Professor and Head of Mechanical Engineering Department for his kind supervision, able guidance and constant encouragement throughout this work.

Next, my heartfelt appreciation and thanks go to Mr. R.R.Gaur for his valuable discussions, suggestions and help at various stages of the work.

I am also thankful to Dr.P.L.Dhar for his valuable suggestions in developing the computer programs.

Thanks are also due to the staff of the Refrigeration Laboratory, particularly Mr. D.S.Saini and Mr.A.K.Sharma and the staff of the Computer Centre for their painstaking assistance and continued cooperation.

Finally, I must acknowledge the meticulous efforts of Mr.Dilbagh Lal in preparation of the tracings and Mr.J.N.Saini, in typing the manuscript.

(R.S.Agarwal)

## C O N T E N T S

NOMENCLATURE	i-vi
CHAPTER 1 INTRODUCTION	1-6
CHAPTER 2 THERMODYNAMIC PROPERTIES OF PURE SUBSTANCE AND MIXTURES- REVIEW	7-37
2.1 Mixtures	7
2.2 Types of Mixtures	8
2.3 Mixtures Vis-a-Vis Pure Substance	9
2.4 Establishment of Thermodynamic Properties of Pure Fluorocarbons	11
2.4.1 Methods to Establish Properties	11
2.5 Review of the Methods for Establishing Mixture Properties	17
2.6 Review of Previous work on Thermody- namic Properties of Fluorocarbon Mixtures	33
2.7 Concluding Remarks	35
CHAPTER 3 VAPOUR-LIQUID EQUILIBRIUM AND EVALUATION OF THERMODYNAMIC PROPERTIES	38-65
3.1 Introduction	38
3.2 Vapour-Liquid Equilibrium	38
3.2.1 The Wilson Equation	41
3.2.2 The Reference State Fugacity	43
3.2.3 Vapour Pressure Data for Pure Components and Mixtures	45
3.3 Fugacity Coefficient	48
3.3.1 Equation of state	48
3.3.2 Fugacity Coefficient for Mixtures	55

3.4	Bubble Point and Dew Point Calculations	56
3.5	Calculation of Properties	57
3.5.1	Enthalpy Calculation	59
3.5.2	Entropy Calculation	63
3.6	Properties of Aqua-Ammonia Mixtures	65
CHAPTER 4	EXPERIMENTAL SET-UP AND EQUILIBRIUM DATA OF R 12 - R 13 MIXTURES	66-85
4.1	Introduction	66
4.2	Equilibrium Still	67
4.3	Constant Temperature Bath	68
4.4	The Temperature Regulator(Thermostat)	68
4.5	Pressure Measuring Arrangement	70
4.6	Temperature Measuring Arrangement	72
4.7	Gas Chromatograph Unit	73
4.7.1	Basic Features	73
4.7.2	Selection of Column and Stationary Phase	74
4.7.3	Gas Sampler	75
4.8	Measurement Technique and Experimental Data	77
CHAPTER 5	DISCUSSION OF RESULTS FOR R 12 - R 13 MIXTURES	86-102
5.1	Introduction	86
5.2	Vapour-Pressure of R 12 - R 13 Mixtures	86
5.3	The Behaviour of R 12 - R 13 Mixtures	87
5.4	Vapour-Liquid Equilibrium	88
5.4.1	The Activity Coefficients	92
5.4.2	The Fugacity Coefficients	93

5.4.3	Temperature-Composition Diagram	93
5.4.4	Pressure-Composition Diagram	97
5.4.5	x-y Diagram	98
5.5	Thermodynamic Properties of R 12 - R 13 Mixtures	99
5.5.1	Enthalpy and Entropy of Mixing	99
5.5.2	Entropy-Composition Diagram	100
5.5.3	Enthalpy-Composition Diagram	100
5.5.4	Pressure-Enthalpy Diagram	101
CHAPTER 6	VAPOUR-COMPRESSION CYCLE CALCULATIONS USING MIXTURES OF R 12 AND R 13	103-112
6.1	Introduction	103
6.2	Operating Conditions	105
6.3	Thermodynamic Analysis of Non-Isenthalpic Refrigeration Cycle	106
6.4	Discussion of Results	111
CHAPTER 7	CONCLUSIONS	113-117
