fulfilment of the requirements
for the award of the degree of
DOCTOR OF PHILOSOPHY

Department of Physics
INDIAN INSTITUTE OF TECHNOLOGY, DELHI
NEW DELHI-110016
JULY, 1988

ACKNOWLEDGEMENTS

It is a matter of great pleasure and pride for me to express my deep sense of gratitude to my supervisor, Dr. H.C.Gupta, Asstt. Professor, Department of Physics, I.I.T. Delhi, for his constant help, painstaking guidance, stimulating and fruitful discussions and his untiring efforts throughout the present investigations. The author further expresses his sincere thanks to Prof. B.B.Tripathi, Department of Physics, I.I.T. Delhi, for his useful suggestions and encouragement at various stages during the course of this work. I am also thankful to Prof. M.S.Sodha, Head, Department of Physics, I.I.T. Delhi and to authorities of Computer Centre, I.I.T. Delhi, for providing the requisite facilities for this work.

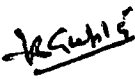

I would like to thank Prof. L.Pintschovius, Kernforschungszentrum Karlsruhe, Institut fur Nukleare Festkorper-physik, D-7500 Karlsruhe, Federal Republic of Germany, for supplying his experimental data on phonons in A-15 superconductors, prior to publication. I express my sense of gratitude to Dr. S.P.Bhatnagar and Dr. (Mrs.) Geeta Sood, for their comments and suggestions and to all my co-research scholars and colleagues for their cooperation and encouragement.

The author wants to express gratitude to his mother for her constant inspiration, help and encouragement during the

tenure of this work. The patient understanding and cooperation extended at the final stage of this work by my wife, Rekha Gupta, is greatly appreciated. The author is also grateful to his other family members and friends for their timely help and cooperation.

The financial assistance received from the Indian Institute of Technology, New Delhi-110016, is thankfully acknowledged. The services of Mr. N.S.Gupta for the efficient drawings are also appreciated.

Dated : 18-07-1988.
