

REALIZED KÄLLÉN-PAULI EQUATION

By

G.V.A.V.B. CHANDRA RAJU

**Thesis submitted to Indian Institute of Technology
Delhi, for the award of the degree of Doctor of Philosophy**

**Department of Physics
Indian Institute of Technology, Delhi
December 1978**

ACKNOWLEDGMENTS

It is indeed a very pleasant task to acknowledge my gratitude to Dr. P.L. Srivastava who initiated me to some of the fundamental problems of particle physics. It was through several interesting conversations with him that I learnt a great deal of the finer aspects of the particle physics than him. I am very grateful to him for constructive criticism of the text of the thesis and the modifications he suggested, the appendix in particular and some others in general.

I was equally fortunate to have Dr. K.P. Jain as my supervisor particularly at a stage when many hurdles put me in utter despair to give up the thesis. To Prof. K.L. Bhanu, and Prof. A.K. Chakrabarti, I am deeply indebted, but for timely help this thesis would not have come up. I thank them all sincerely.

I wish to thank my friends Messrs G.P. Singh, B.V. Madhukar S.K. Kumbhar and N.V. Murthy for their assistance. Especially the assistance of Messrs G.P. Singh and Murthy is deeply unforgettable.

I am thankful to Mr. Ramesh Lal Sharma who neatly typed a painstakingly retouched manuscript.

CONTENTS

	A Note on Symbols.	(i)
1.	INTRODUCTION AND REVIEW	1
	1. Introduction	1
	II. The Problem	4
	III. Review	7
	IV. Kallen-Pauli(KP)Equation	8
	V. Solution of KP Equation	13
	VI. Evaluation of the Constants	19
	VII. $V \ominus$ S-Matrix	23
	VIII. The Production Amplitude	23
	IX. An Interesting Ansatz.	26
2.	2V-PARTICLE MODEL	27
	1. The Model	27
	II. The Physical $ V\rangle$ Particle	29
	III. Some Important Functions and Their Properties.	32
	IV. The $N\theta$ -Scattering	37
	V. The T-Matrix in the $N\theta$ Sector.	39
3.	GENERALIZED KALLEN-PAULI EQUATION-1 ($V \ominus$ SECTOR)	42

4.	SOLUTION OF THE GKP-1 EQUATION	48
1.	Inverses of the Basic Functions	48
II.	Solution of the GKP-1 Equation	54
III.	Evaluation of the Constants	58
IV.	Properties of C_1 and C_2	65
V.	The $V\theta$ S-Matrix	66
VI.	Derivation of $T(\omega_0)$ Amplitude	68
VII.	The Production Amplitude.	71
5.	GENERALIZED KALLEN-PAULI EQUATION-II (THE $3V$ -PARTICLE MODEL)	76
1.	Introduction	76
II.	The Model	76
III.	The Physical $ \square\rangle$ State	78
IV.	The Properties of the Function	88
V.	$N\theta$ Scattering	92
VI.	GKP-Equation-II	94
VII.	Solution of the Integral Equation	98
VIII.	Evaluation of the Constants	100
IX.	The $V\theta$ S-Matrix	104
X.	The Production Amplitude.	105

6.	GENERALIZED KALLEN-PAULI EQUATION-III	107
1.	The Model	107
II.	The Physical $ \square\rangle$ State	108
III.	Properties of the Function $h(\omega)$	113
IV.	$N\theta$ Scattering	116
V.	GKP Equation-III	117
VI.	Solution of the GKP Equation-III	120
VII.	The $V\theta$ S-Matrix	124
VIII.	The Production Amplitude.	124
7.	DISCUSSION	126
1.	Uniqueness	126
II.	Peierls's Mechanism	128
III.	Scope	129
	REFERENCES	131
	APPENDIX	134
