C E R T I F I C A T E

This is to certify that the thesis entitled "Studies on the Effect of Sorbose on Biosynthesis and Properties of Cellulase Enzymes in *Trichoderma reesei*" submitted by Ms. Benu Sethi has been prepared under our supervision in conformity with the rules and regulations of the Indian Institute of Technology, Delhi. The research report and results presented in the thesis have not been submitted for any degree or award in any other university.

(V.S. Bisaria)

(S. Mishra)

ACKNOWLEDGEMENT

It is a great pleasure to express my sincere gratitude and thanks to my project supervisors Prof. V.S. Bisaria and Dr. Saroj Mishra for their inspiration guidance and keen interest. Their cooperation and valuable suggestions helped me to complete the project in time.

I am thankful to Prof. Subhash Chand, Head of the Department, for providing all the laboratory facilities to complete my research work. My sincere thanks are also to Prof. T.K. Ghosh, Prof. P. Ghosh and Prof. K.B. Ramachandran for their criticism and suggestions.

I am grateful to Mr. V.K. Ghosh for taking the gel photograph and helping me with HPLC. I am also thankful to Mrs. Mathai, Renu, Neera, Mukesh, Bhagwan Singh and Sunita for their occasional help and cheerful company.

I sincerely thank Dr. Madhu Saxena for critically reading my thesis and giving appropriate suggestions. I am also thankful to my colleague Mr. R. Banka for helping me with FPLC and constant cooperation. I also thank my friends Niharika, Bhattacharya, Malini, Apurba and Manjula for their company and cooperation. Thanks are also due to Mr. Giri for patiently typing this manuscript.

I am gratefully indebted to my parents especially my father whose dreams and aspirations made me choose this carrier. Finally, I wish to thank my husband, without whose moral support and encouragement I would not have completed my research. I am also grateful to my son Parth and my family members for their utmost cooperation during the preparation of this manuscript.

Benu Sethi

CONTENTS

	Page No.
Chapter - 1 INTRODUCTION AND OBJECTIVES	1-7
1.1 Introduction	1
1.2 Objectives	7
Chapter - 2 LITERATURE REVIEW	8-34
2.1 Overview and Importance of Cellulases	9
2.2 Cellulase Producing Microorganisms	10
2.3 Cellulolytic Enzymes of <i>T. Reesei</i> and Their Properties	14
2.4 Development and Properties of Mutants	22
2.5 Regulation of Cellulases in <i>T. Reesei</i>	24
2.6 Regulatory Effect of L-Sorbose on Cellulase Biosynthesis	26
2.7 Adsorption of Cellulase and Cellulose Hydrolysis	29
Chapter - 3 MATERIALS AND METHODS	35-56
3.1 Materials	36
3.1.1 Equipment	36
3.1.2 Chemicals	36
3.2 Cultures and Culture Conditions	37
3.3 Fractionation of Mycelia	39
3.4 Fractionation of Cellulase Components by Fast Performance Liquid Chromatography (FPLC)	39
3.5 Adsorption of Cellulases on Cellulose	40

3.6	Cellulose Hydrolysis	41
3.7	Enzyme Assays	42
3.7.1	Filter paper activity	42
3.7.2	Endoglucanase activity	43
3.7.3	β -Glucosidase activity	43
3.7.4	Cellobiohydrolase activity	44
3.7.5	Xylanase activity	44
3.7.6	Amylase activity	45
3.7.7	Acid phosphatase activity	45
3.8	Analytical Methods	45
3.8.1	Total reducing sugars	
3.8.1.1	Dinitrosalicylic acid method	46
3.8.1.2	Nelson - Somogyi method	47
3.8.2	Estimation of sorbose	48
3.8.3	Estimation of cellulose	48
3.8.4	Estimation of proteins : Folin Lowry method	49
3.8.5	Estimation of dry cell mass	50
3.8.6	Estimation of cellodextrins and other sugars by High Pressure Liquid Chromatography (HPLC)	51
3.8.7	Gel electrophoresis	52
3.8.7.1	Polyacrylamide Gel Electrophoresis (PAGE)	52
3.8.7.2	PAGE - zymogram	55
Chapter - 4	RESULTS	56-108
4.1	Effect of L(-) Sorbose Addition on Cellulase Synthesis by Various <i>Trichoderma</i> Species on Cellulose and Soluble Sugars	57

4.2	Growth of and Sugar Uptake by <i>T. Reesei</i> in Sorbose-Supplemented and Unsupplemented Cellobiose and Glucose Cultures	63
4.3	Effect of Sorbose on Intracellular and Extracellular Cellodextrins in Cellobiose-Grown Cultures of <i>T. Reesei</i> QM9414	66
4.4	Effect of Sorbose on Intracellular and Extracellular Cellodextrins in Avicel Cellulose-Grown Cultures of <i>T. Reesei</i> QM9414	74
4.5	Effect of Sorbose on Cellulase Synthesis in <i>T. Reesei</i> QM9414 and C-5 Cultures	77
4.5.1	Cellulase synthesis on soluble sugars	77
4.5.2	Cellulase synthesis on sorbose supplemented soluble sugars	80
4.6	Adsorption of Cellulase on Cellulose	90
4.6.1	Adsorption characteristics of cellobiohydrolase	90
4.6.2	Adsorption characteristics of endoglucanase	93
4.7	Enzymatic Hydrolysis of Cellulose	99
