ABSTRACT

CHAPTER I	MEASUREMENT OF LOW PRESSURE	1
	1.1 Introduction	1
	1.2 Basic Principle of McLeod Gauge	5
	1.3 The Chief Sources of Errors and Their Elimination	6
	1.4 The Bakeable McLeod Gauge	9
	1.5 Details of Experimental System	12
	1.6 Experimental Procedure	14
	1.7 Study of Capillary Depression Phenomena	16
	1.7.1 Correction due to Capillarity in Wide Bore Reference Arm Tube	19
	1.8 Study of Mercury Vapour Drag Effect	27
	1.8.1 Theoretical Treatment	30
	1.8.2 Experimental Results and Discussion	35
	1.9 Conclusion	39
	References	41
CHAPTER II	MEASUREMENT OF THROUGHPUT	45
	2.1 Concept of Throughput	45
	2.2 A Survey of Different Types of Flowmeters	47
	(a) Constant Pressure Flowmeter	48

	<u>Page No.</u>
(b)Constant Volume Flowmeter	49
(c)Liquid Displacement Flowmeter	49
2.3 A Modified Stevenson Type Flowmeter	53
2.3.1 Operation	54
2.4 Investigation of a New Type of Relative Flowmeter	57
2.4.1 Design and Operation	58
2.4.2 Calibration Characteristics	60
2.4.3 Discussion	61
References	64
 CHAPTER III	
MEASUREMENT OF INTRINSIC SPEED AND CRITICAL BACKING PRESSURE	66
SECTION A: Measurement of Intrinsic Speed	66
3.1 Introduction	66
3.1.1 Use of the Same Diameter Test Dome	69
3.2 Theoretical Aspects	72
3.3 Experimental Details and Procedures	74
3.3.1 Test Dome Method	75
3.3.2 Conductance Tube Method	77
3.3.2.1 Measurement Procedure	79
3.4 Results and Discussion	81
SECTION B: Study of Critical Backing Pressure	85
3.5 Concept of Critical Backing Pressure	85
3.6 Experimental Set-Up	88
3.6.1 Measuring Procedure	89
3.7 Calibration of Pirani Gauge	92

	Page No.
3.8 Results and Discussion	92
References	95
CHAPTER IV STUDY OF GAS BEAMING EFFECT INSIDE THE TEST DOME	98
4.1 Introduction	98
4.2 Theoretical Consideration	104
4.2.1 Tubulated Gauge Connection	104
4.2.2 Orifice Gauge Connection	108
4.3 Location of Pressure Gauge for $S_{\text{ex}} = S$	111
(a) Tubulated Gauge	111
(b) Orifice Gauge	112
4.4 Effect of Gauge Inlet Orientation	114
4.4.1 Values of Y_0/R for the Orientations A and C	119
4.5 Details of Experimental Set-Up and Procedure	121
4.6 Results	126
4.6.1 Comparison of Measured and Experimentally Computed Throughput	126
4.6.2 A New Approach to Intrinsic Speed Measurement	128
4.6.3 Measurement of Molecular Conductance	130
4.6.4 Number of Gas Molecules/Sec Crossing the Orifice of the Test Dome at any Position	131
4.6.5 Comparison of Experimentally Measured and Theoretically Determined Speeds	134

4.6.6 Effective Conductance and the Test Dome Constant	139
4.6.7 Pressure Distribution in Axial Direction	143
4.7 Discussions	144
4.8 Conclusion	148
References	152
