CERTIFICATE

This is to certify that the thesis entitled "Thermodynamic and Spectral Properties of Solutions of n-Donors and Iodides of As, Sb, Bi and Sn" being submitted by Mr. Bivekanand Mishra to the Indian Institute of Technology, Delhi, for the award of degree of Doctor of Philosophy in Chemistry, is a record of bonafide research work carried out by him. Mr. Bivekanand Mishra has worked under my guidance and supervision and has fulfilled the requirements for the submission of thesis.

The results contained in this thesis have not been submitted, in part or in full, to any other University or Institute for the award of any degree or diploma.

(V. Ramakrishna)
Thesis Supervisor.

Head of Chemistry Department,
Indian Institute of Technology,
Hauz Khas, New Delhi-29.

ACKNOWLEDGEMENTS

I express my deep sense of gratitude to Prof. V. Ramakrishna, Senior Professor, Chemistry Department, Indian Institute of Technology, Delhi, for his constant guidance and sincere supervision during the work without which it would have been impossible to complete the present thesis.

I wish to record my sincere thanks to Dr. N.K. Jha and Dr. S.K. Suri, Chemistry Department, Indian Institute of Technology, Delhi, for their interest in the progress of the work.

Thanks are due to all faculty members (my ex-colleagues of Chemistry Department, I.I.T. Delhi) and graduate students for the co-operation received.

I wish to express my thankfulness to the Principal, Sahibganj College, Sahibganj (S.P.), Bihar, for granting me study leave, and to the Director, I.I.T. Delhi, for research scholarship from 1967 to 1968 and for appointment as faculty member in Chemistry Department.

I also thank U.G.C., New Delhi for financial assistance for a part of this work.

B. Mishra

(Bivekanand Mishra)
Chemistry Department, I.I.T., New Delhi.
and
Chemistry Department, Sahibganj College,
Sahibganj (S.P.), Bihar.

	Page
Chapter I.	I.
Introduction	
(a) Theoretical considerations.	3.
(b) Weak interactions.	7.
(c) Donor and acceptor: types and functions.	10.
(d) Formation constants and molar extinction coefficients.	11
(e) Other thermodynamic parameters.	13
(f) Criteria for reliability of data.	22.
(g) Solubility measurements.	24
(h) Time dependence of absorption spectra of complexes.	24
(i) Examples of application to iodine and iodides.	26
(j) Scope of the work.	29
(k) References.	31
Chapter II.	
Experimental methods.	
(a) Preparation, purification and analysis of the iodides.	35
(b) Preparation of solvents.	39
(c) Spectrophotometric measurements.	43
(d) Solubility measurements.	46
Table I.	
Chapter III.	
SnI_4 -dioxane solutions.	
Introductory survey.	49
Results and discussion.	
(a) Effect of impurities in solvent.	49
(b) Absorbance due to I_3^- .	53
