

IRRADIANCE DISTRIBUTION IN DIFFRACTION
LIMITED OPTICAL SYSTEMS

Anil Kumar Kavathekar

Thesis submitted to Indian Institute of Technology, Delhi,
for partial fulfilment of the degree of
Doctor of Philosophy

1970

ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to Professor P.K. Katti for his valuable guidance and constant encouragement. Sincere thanks are also due to Mr. Kehar Singh for stimulating discussions and useful suggestions in this work.

I am also thankful to my friends for their help at various stages of the work.

This work was partially supported by the Council of Scientific and Industrial Research, India.

A. K. Karanth

CONTENTS

	Page
PREFACE ..	1
CHAPTER I INTRODUCTION AND BASIC PRINCIPLES OF FOURIER OPTICS ..	7
A. Introduction ..	7
B. Basic Principles of Fourier Optics ..	11
1.1 Point and Line Spread Functions ..	11
1.2 Image of a Point Source and Fourier Transform ..	12
1.3 Image of an Incoherent Extended Object ..	16
1.4 Optical Transfer Function ..	20
CHAPTER II CHARACTERISTICS AND EVALUATION OF OPTICAL TRANSFER FUNCTION ..	21
2.1 Dependence of OTF on the Spread Function ..	21
2.2 Dependence of OTF on Pupil Function ..	26
2.3 OTF and Filtering of Spatial Frequencies ..	28
2.4 Difficulties in the use of Sine Wave Objects ..	29
2.5 [REDACTED] ..	[REDACTED]
2.6 [REDACTED] ..	[REDACTED]
2.7 [REDACTED] ..	[REDACTED]

		Page
CHAPTER III	RECTANGULAR AND TRIANGULAR WAVE RESPONSE OF OPTICAL SYSTEMS WITH ANNULAR APERTURE	35
3.1	Transfer Function of the Annular Aperture	37
3.2	Images of Infinite Rectangular and Triangular Wave Objects through Annular Aperture	44
3.3	Images of Square, Triangular and Sine Wave Objects of Finite Extent	48
3.4	Results and Discussion	54
3.4.1	Image of a Sine Wave Object and the Trans- fer Function	54
3.4.2	Images of Periodic Rectangular and Triangular Wave Objects	55
CHAPTER IV	RECTANGULAR AND TRIANGULAR WAVE RESPONSE OF A CIRCULAR APERTURE WITH AMPLITUDE FILTER	64
4.1	Transfer Function of a Circular Aperture with an Amplitude Filter	65
4.2	Images of Rectangular and Triangular Wave Objects through a Circular Aperture with Amplitude Filter	68
4.3	Results and Discussion	70
CHAPTER V	RECTANGULAR AND TRIANGULAR WAVE RESPONSE OF A CIRCULAR APERTURE PLACED IN AN INHOMOGENEOUS MEDIUM	75
5.1	Transfer Function of an Image Forming System in Presence of Atmospheric Turbulence	77

	5.2	Images of Periodic Rectangular and Triangular Wave Objects Formed by a Circular Aperture Placed in Turbulent Medium ..	78
	5.3	Results and Discussion ..	79
CHAPTER VI		RECTANGULAR AND TRIANGULAR WAVE RESPONSE OF A FIBER ASSEMBLY USED AS A DYNAMIC SCANNER ..	82
	6.1	Transfer Function of a Fiber Bundle Scanning Dynamically ..	83
	6.2	Images of Periodic Rectangular and Triangular Wave Objects through a Dynamically Scanning Fiber Bundle ..	85
	6.3	Results and Discussion ..	86
CHAPTER VII		MODULATION TRANSFER FUNCTION OF AN ON AND OFF AXIS ANNULAR APERTURE IN PRESENCE OF POLYCHROMATIC LIGHT ..	88
	7.1	Transfer Function of an Elliptical Annular Aperture in the Presence of Polychromatic Light ..	89
	7.2	Results and Discussion ..	91
BIBLIOGRAPHY		..	94
