DEDICATED TO MY MOTHER

CERTIFICATE

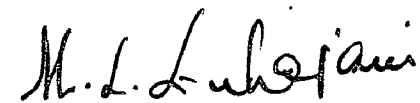

Certified that the dissertation entitled " STUDIES ON TASAR SILK ", which is being submitted to the Indian Institute of Technology, Delhi, by Subrata Das, in fulfilment for the award of the Degree of DOCTOR OF PHILOSOPHY is a record of the student's own work carried out by him under our joint supervision and guidance. The matter embodied in this dissertation has not been submitted for the award of any Degree or Diploma.

(R. Chattopadhyay)

Assistant Professor

Department of Textile Technology,
Indian Institute of Technology, Delhi
New Delhi 110016

(M.L. Gulrajani)

Professor

Department of Textile Technology,
Indian Institute of Technology, Delhi
New Delhi 110016

ACKNOWLEDGEMENTS

The author is sincerely grateful and highly indebted to his supervisors, Dr. R. Chattopadhyay and Prof. M.L. Gulrajani, of Textile Technology Department, Indian Institute of Technology, Delhi, for their systematic guidance and constant encouragement at every stage of this project.

The author is specially thankful to Prof. Kushal Sen for his invaluable suggestions at various stages of this project. The author wishes to express sincere gratitude to Prof. K.R. Salhotra, Head of the Department, for his keen interest in this project.

The author wishes to thank Dr. T.H. Somashekhar, Director, and Dr. G.S. Nadiger, Joint Director, Central Silk Technological Research Institute, Bangalore, for supplying cocoons, yarn samples and necessary literatures for this study.

The constant inspirations and encouragements given by all research colleagues during this work are sincerely acknowledged.

The assistance given by all the staff of Textile chemistry, Textile testing, Spinning, Fibre science, Weaving, Computer science laboratory and Store section, is also sincerely acknowledged.

Finally the author would like to thank his wife, daughter and parents for their encouragement and wishings over the years.

Subrata Das

CONTENTS

CONTENTS

	ABSTRACT	
PART 1	CHARACTERISTICS OF TASAR : FILAMENT AND YARN	
CHAPTER 1	INTRODUCTION AND REVIEW OF LITERATURE	
1.1	TASAR SILKWORM	2
1.1.1	Classification	2
1.1.2	Voltinism	2
1.1.3	Life Cycle of Different Tasar Silkworm	3
1.1.3.1	<i>Antheraea mylitta</i>	3
1.1.3.2	<i>Antheraea pernyi</i>	5
1.1.3.3	<i>Antheraea yamamai</i>	7
1.1.3.4	<i>Antheraea proylei</i>	8
1.2	CHARACTERISTICS OF TASAR COCOONS	9
1.2.1	Colour	10
1.2.2	Cocoon Weight	10
1.2.3	Shell Weight	11
1.2.4	Shell Percentage	11
1.2.5	Denier	12
1.2.6	Filament Shade	12
1.3	COMPOSITION OF TASAR COCOONS	12
1.3.1	Presence of Tannin	13
1.3.2	Inorganic Substances	13
1.3.3	Cocoon Wax	15
1.3.4	Heterogeneity in Tasar Cocoon	16
1.4	COOKING	19
1.4.1	Cooking Methods	21
1.4.1.1	Traditional Method	21
1.4.1.2	Enzymatic Method	21
1.4.1.3	Diammonium Phosphate Method	22

1.4.1.4	Hydrogen Peroxide Method	23
1.5	CHARACTERIZATION OF TASAR SILK FILAMENT	25
1.5.1	Structure of Tasar Fibroin (Filament)	25
1.5.2	Properties of Tasar Fibroin	29
1.5.2.1	Reactivity towards Chemicals	31
1.5.2.2	Microscopic View	32
1.6	CHARACTERIZATION OF TASAR SILK YARN	32
1.6.1	Mechanical Properties of Tasar Yarn	33
1.6.2	Time-dependent Mechanical Properties of Tasar Filament and Yarn	34
1.6.3	Imperfections/Faults in Tasar Silk Yarn	34
1.6.4	Cohesion of Tasar Yarn	35
1.6.4.1	Importance of Cohesion	35
1.6.4.2	Evaluation of Cohesion	35
1.7	OBJECTIVE EVALUATION OF APPEARANCE OF SILK YARN	36
1.8	USE OF TASAR SILK	38
1.9	SUMMARY	38

CHAPTER 2 STUDIES ON QUALITY CHARACTERISTICS OF COMMERCIAL TASAR SILK YARNS

2.1	INTRODUCTION	40
2.2	EXPERIMENTAL	40
2.2.1	Materials	40
2.2.2	Evaluation of Quality Characteristics	41
2.2.2.1	Determination of Mass Irregularity (Evenness)	41
2.2.2.2	Evaluation of Imperfection	41
2.2.2.3	Determination of Cross-sectional Shape	43
2.2.2.4	Evaluation of Mechanical Properties	43

2.3	RESULTS AND DISCUSSION	43
2.3.1	Physical Properties	43
2.3.2	Imperfections	48
2.3.3	Mechanical Properties	55
2.3.4	Stress-strain Diagrams for Yarns and Brins	63
2.3.5	Cross-sectional Shape	67
2.4	CONCLUSIONS	71
CHAPTER 3 CHARACTERIZATION OF TASAR FILAMENT WITHIN A COCOON		
3.1	INTRODUCTION	72
3.2	EXPERIMENTAL	73
3.2.1	Materials	73
3.2.2	Methods	74
3.2.2.1	Cooking Process	74
3.2.2.2	Determination of Residual Sericin	75
3.2.2.3	Determination of Fineness and its Variation	75
3.2.2.4	Distribution of Non-broken Filament Length	75
3.2.2.5	Mechanical Properties	76
3.3	RESULTS AND DISCUSSION	77
3.3.1	Filament Fineness	77
3.3.2	Mechanical Properties	84
3.3.3	Residual Sericin Content	86
3.3.4	Non-broken Filament Length	87
3.4	CONCLUSIONS	89

CHAPTER 4 STRUCTURE AND PROPERTY CORRELATION OF MULBERRY (*Bombyx mori*) AND TASAR (*Antheraea mylitta*) SILK FILAMENTS

4.1	INTRODUCTION	90
4.2	EXPERIMENTAL	91
4.2.1	Materials	91
4.2.2	Methods	91
4.2.2.1	Cooking	91
4.2.2.2	Degumming	91
4.2.2.3	Tensile Properties	91
4.2.2.4	Determination of Structural Characteristics	92
	Density	92
	Birefringence	92
	Orientetion Index	93
	Sonic Modulus	94
	Amino acid Analysis	94
4.3	RESULTS AND DISCUSSION	95
4.3.1	Effect of Wetting on Mechanical Properties	95
4.3.2	Structure-Property Correlation	101
4.4	CONCLUSIONS	104

CHAPTER 5 STUDIES ON CREEP AND STRESS RELAXATION PHENOMENA

5.1	INTRODUCTION	105
5.2	EXPERIMENTAL	106
5.2.1	Materials	106
5.2.2	Methods	106
5.2.2.1	Creep	106
5.2.2.2	Inverse Relaxation	109

5.3	RESULTS AND DISCUSSION	113
5.3.1	Creep	113
5.3.2	Inverse Relaxation Behaviour of Silk Yarn	115
5.3.2.1	Influence of Level of Retraction	115
5.3.2.2	Influence of Cyclic Loading	118
5.4	CONCLUSIONS	121
CHAPTER 6	STUDIES ON CORRELATION BETWEEN YARN QUALITY ATTRIBUTES DETERMINED ON USTER AND SERIPLANE	
6.1	INTRODUCTION	122
6.2	EXPERIMENTAL	123
6.2.1	Material	123
6.2.2	Evaluation	123
6.2.2.1	Visual Assessment	123
	Evenness	125
	Cleanness	126
	Neatness	128
6.2.2.2	Instrumental Assessment	128
	Mass Irregularity and Imperfections	128
6.3	RESULTS AND DISCUSSION	129
6.4	CONCLUSIONS	134
CHAPTER 7	STUDIES ON DEVELOPING A NEW METHOD FOR ASSESSING COHESION IN SILK YARN	
7.1	INTRODUCTION	135
7.2	EXPERIMENTAL	136
7.2.1	Materials	136
7.2.2	Evaluation	136
7.2.2.1	Determination of Residual Sericin	137

7.2.2.2	Determination of Cohesion on Duplan Cohesion Tester	138
7.2.2.3	Determination of Peeling Force	138
7.2.2.4	Assessing Effect of Sericin on Peeling Force	139
7.3	RESULTS AND DISCUSSION	139
7.3.1	Cohesion Determined by Duplan Cohesion Tester and Peeling Force on Instron	139
7.3.2	Residual Sericin vs Cohesion and Peeling Force	144
7.4	CONCLUSIONS	144

CHAPTER 8 STUDIES ON GENERATION OF FAULTS IN TASAR YARN

8.1	INTRODUCTION	146
8.2	EXPERIMENTAL	146
8.2.1	Materials	146
8.2.2	Methods	146
8.2.2.1	Visual Studies of Imperfections	146
8.3	RESULTS AND DISCUSSION	148
8.3.1	Analysis of Imperfection Values in Yarn	148
8.3.2	Structural Feature of Thick Places, Thin Places and Neps	149
8.3.2.1	Thick Places	149
8.3.2.2	Thin Places	149
8.3.2.3	Neps	149
8.3.3	Association Between Thick Places, Thin Places and Neps	152
8.3.4	Mechanism of Generation of Faults	154
8.3.4.1	Thick Places	154
8.3.4.2	Thin Places	154

	8.3.4.3	Neps	155
8.4	CONCLUSIONS		155
PART 2	COOKING OF TASAR COCOON		
CHAPTER 9	STUDIES ON COOKING OF TASAR COCOON WITH ETHYLENEDIAMINE		
9.1	INTRODUCTION		156
9.2	EXPERIMENTAL		157
	9.2.1	Cocoons	157
	9.2.2	Chemicals	157
	9.2.3	Cooking	158
	9.2.4	Evaluation of Properties	158
		9.2.4.1 Shell Weight Loss	158
		9.2.4.2 Silk Recovery	158
		9.2.4.3 Tensile Properties	159
9.3	EXPERIMENTAL DESIGN		159
	9.3.1	Analysis of Data	160
9.4	RESULTS AND DISCUSSION		162
	9.4.1	Shell Weight Loss	162
	9.4.2	Silk Recovery	168
	9.4.3	Tenacity, Breaking Extension and Initial Modulus	168
	9.4.4	Shell Weight Loss and Silk Recovery	170
	9.4.5	Optimisation	170
	9.4.6	Cooking of Different Eco-races of <i>Antheraea mylitta</i>	172
	9.4.7	Effect of Hardness of Water	174
9.5	CONCLUSIONS		175

**CHAPTER 10 STUDIES ON COOKING OF TASAR SILK
COCOON WITH TARTARIC ACID**

10.1	INTRODUCTION	176
10.2	EXPERIMENTAL	177
10.2.1	Cocoons	177
10.2.2	Chemicals	177
10.2.3	Cooking	177
10.2.4	Evaluation of Properties	178
10.2.4.1	Shell Weight Loss	178
10.2.4.2	Silk Recovery	178
10.2.4.3	Tensile Properties	178
10.3	EXPERIMENTAL DESIGN	179
10.3.1	Analysis of Data	170
10.4	RESULTS AND DISCUSSION	181
10.4.1	Silk Recovery	181
10.4.2	Shell Weight Loss	184
10.4.3	Tenacity, Breaking Extension and Initial Modulus	186
10.4.4	Interaction Between Silk Recovery and Shell Weight Loss	186
10.4.5	Optimisation	188
10.4.6	Effect of Hardness of Water	189
10.4.7	Comparative Assessment with other Cooking Methods	189
10.5	CONCLUSIONS	191
