

KINETIC STUDIES ON MICROBIAL CONVERSION
OF
NAPHTHALENE TO SALICYLIC ACID

BY
S.K. TANGNU

CHEMICAL ENGINEERING DEPARTMENT

THESIS SUBMITTED TO THE INDIAN INSTITUTE OF TECHNOLOGY, DELHI
FOR THE AWARD OF THE DEGREE OF
DOCTOR OF PHILOSOPHY

INDIAN INSTITUTE OF TECHNOLOGY, DELHI
HAUZ KHAS, NEW DELHI - 110029

SEPTEMBER 1976

CERTIFICATE

This is to certify that the thesis entitled "Kinetic Studies on Microbial Conversion of Naphthalene to Salicylic Acid" submitted by Sri S.K.Tangnu has been prepared under my supervision in conformity with the rules and regulations of the Indian Institute of Technology, Delhi. The research report and results presented in the thesis have not been submitted for any degree in any other University.

(T.K.Ghose)

ACKNOWLEDGEMENT

I extend my thanks to my research supervisor, Prof. Dr. T.K.Ghose, Head, Biochemical Engineering Division for giving me an opportunity of working in his laboratories. Because of his pragmatic approach and not doctrinaire, it was possible for me to complete the research assignment in spite of the practical problems. His philosophy of subjectivity and discipline of detachment, avoided me to lose in objective, thus avoiding me to lapse into routine and rigidity.

I wish to thank my friends and colleagues, Mr. Vikram Sahai, Dr. A.H.Khan, Dr. P.Ghosh, Mr. S.Chand, Mr. B.P.Mishra, Dr. A.N.Pathak, Dr. Vinod Saxena, Mr. G.P.Dwivedi and Mr. R.K.Sachdev for their invaluable help and encouragement from time to time.

Special thanks are extended to Mr. V.Kannan, Research Scholar for helping in Computer Programming and other mathematical calculations.

Sincere thanks are also extended to my friends Mr. V.S. Bisaria and Dr. S.N.Mukhopadhyay, both faculty members of Biochemical Engineering Division.

Appreciation is extended to Mr. Subroto Sen Ray and to Mr. G.N.Sharma for their kind help. Finally, I thank Mr. R.N.Shukla who patiently typed this final draft.

(S.K.Tangnu)

CONTENTS

Page No.

CHAPTER-1

1.	INTRODUCTION	...	I - 19
1.1	Occurrence, uses and properties of salicylic acid		
1.2	Historical developments		
1.3	Organisms		
1.4	Intermediate metabolic pathway		
1.5	Factors affecting the salicylate production		
1.6	Genesis		

CHAPTER-2

2.	MATERIALS AND METHODS	...	19 - 48
2.1	Significance		
2.2	Vessels, equipment and instruments		
2.3	Sterilization of media, air and vessels		
2.4	Stock culture		
2.5	Inoculum		
2.6	Stock solutions		
2.7	Emulsion technology		
2.8	Dialyser and ion-exchange column		
2.9	Continuous fermentation set up		
2.10	Study of reactions in in-vivo		
2.11	Standard medium and experimental conditions		
2.12	Analysis		
2.13	Qualitative detection		
2.14	Product recovery		

CHAPTER-3

3. RESULTS	...	49 - 152
3.1 Shake culture studies		
3.2.1 Medium establishment		
3.1.2 Process variables		
3.1.3 Emulsification phenomenon		
3.1.4 Double substrate		
3.1.5 Control mechanism and regulation		
3.2 Five-litre submerged studies		
3.2.1 Process variables		
3.2.2 Emulsification phenomenon		
3.2.3 Control mechanism and regulation		
3.3 Continuous fermentation		

CHAPTER-4

Kinetic studies	...	153 - 173
-----------------	-----	-----------

CHAPTER-5

Discussion	...	174 - 186
------------	-----	-----------

CHAPTER-6

Conclusion	...	187 - 193
