

LOAD FREQUENCY CONTROL OF POWER SYSTEM

By

NITYANANDA SAHA

Department of Electrical Engineering

Submitted

in fulfilment of the requirement of the
degree of Doctor of Philosophy
to the

Indian Institute of Technology Delhi

JULY - 1976

CERTIFICATE

This is to certify that Mr. Nityananda Saha has been working on his dissertation on Load Frequency Control of Power System in partial fulfillment of the requirement of Ph.D. degree of I.I.T., New Delhi since August, 1973. The entire research contained in the thesis was carried out under my supervision. Mr. Saha has contributed significantly to research in the area of Load Frequency Control and I am sure that the thesis meets the standard of work required for award of the Ph.D. degree of the Institute. The materials contained in the thesis are new and original contributions of Mr. Saha.

Sarat C. Tripathy

(Dr. Sarat C. Tripathy)
Assistant Professor,
Electrical Engineering,
Indian Institute of Technology,
New Delhi - 110029,
INDIA .

TO

MY MASTER

ACKNOWLEDGEMENT

I whole-heartedly express my deep sense of gratitude and indebtedness to Dr. Sarat C. Tripathy for his active guidance and help all through the course of the investigation, starting from the formulation of the problem till the end of the preparation of the thesis.

I express my indebtedness to the Heads Dr. P.S. Satsangi and Dr. M.K. Jain and faculty members of the Electrical Engineering Department and the Computer Centre for all facilities given to me. I express my sincere thanks to Dr. S.P. Raychoudhuri, Head of Electrical Engineering Department of my parent Institute, Regional Engineering College, Durgapur, West Bengal, for kindly sponsoring me for the research work. I thank Mr. Ranjit Kumar for kindly typing the thesis. I thank all those who helped me in the fulfilment of this venture.

Nityananda Saha
(NITYANANDA SAHA)

CONTENTS

CHAPTER		<u>Page</u>
One	INTRODUCTION	1
Two	Stability of Classical Load Frequency Control System with Governor Dead-Band Nonlinearity	20
Three	Optimal Load Frequency Control System Using Steam and Hydro Turbines	30
Four	Suboptimal Load Frequency Control System Using Nonreheat and Reheat Steam Turbines	65
Five	Dynamic and Bang Bang Load Frequency Control System	74
Six	Consideration of Governor Dead-Band Nonlinearity in Optimal Dynamic Controller	86
Seven	Effect of Area Load Voltage Characteristic on Load Frequency Control System	95
Eight	Optimal and Suboptimal Voltage Regulator for Improving Frequency and Tie-Line Power Transient Response	102
Nine	Conclusion	118
