

SOME STUDIES ON HIGH PRESSURE SQUEEZING IN SIZING

By

BIJOYA KUMAR BEHERA

*A THESIS SUBMITTED TO THE
INDIAN INSTITUTE OF TECHNOLOGY, DELHI
FOR THE AWARD OF THE DEGREE OF
DOCTOR OF PHILOSOPHY*

Department of Textile Technology
INDIAN INSTITUTE OF TECHNOLOGY, DELHI
APRIL, 1989

ACKNOWLEDGEMENTS

I sincerely, express my deep sense of gratitude to Prof. P.K. Hari, Department of Textile Technology, Indian Institute of Technology, Delhi, and Dr. Jai Prakash, Director, Northern India Textile Research Association, (NITRA) Ghaziabad, for their fraternal guidance, personal attention and encouragement which spurred me on to completing this thesis. I also acknowledge Dr. K. Dhawan, Senior Textile Technologist, NITRA, who generously supervised me at the initial phase of this work.

I am also grateful to the Head of Textile Technology Department, IIT, Delhi, for granting permission to carry out this work. Appreciation is extended to Ministry of Textiles, Govt. of India, for sponsoring this project.

I also wish to acknowledge Dr. S.M. Ishtiaque, Asstt. Professor, IIT, Delhi, for his help and co-operation whenever it was needed.

The assistance rendered by the staff of Fabric Manufacturing Lab., IIT, Delhi, needs special mention.

Lastly, I thank Mr. Rajesh Arora, for efficient typing and word processing of the manuscript of this thesis.

(B.K. Behera)

CERTIFICATE

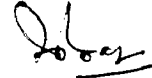

This is to certify that the thesis entitled "SOME STUDIES ON HIGH PRESSURE SQUEEZING IN SIZING" submitted by Mr. Bijoya Kumar Behere to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy is a record of bonafide research work carried out by him. Mr. B.K. Behera has worked under our guidance and supervision and has fulfilled requirements for the submission of the thesis, which to our knowledge has reached the requisite standard.

(Dr. P.K. Hari)

Professor

Department of Textile Technology
Indian Institute of Technology,
New Delhi-110016.

(Dr. Jai Prakash)

Director

North India Textile
Industries Research
Association, Ghaziabad.

(Dr. K. Dhawan)

Sr. Textile Technologist
NITRA, Ghaziabad.

CONTENTS		<u>Page No.</u>
	SUMMARY	i-iv
CHAPTER 1	GENERAL INTRODUCTION	1
1.1	The Problem	1
1.2	Aim of the Work	5
CHAPTER 2	REVIEW OF LITERATURE	7
PART 2.1	A REVIEW ON ENERGY CONSUMPTION IN SIZING	7
2.1.1	Introduction	7
2.1.2	Thermal Energy Consumption	9
2.1.3	Different Areas for Thermal Energy Consumption during Sizing Operation	12
2.1.4	Electrical Energy Consumption	14
2.1.5	Different Areas for Electrical Energy Consumption	14
2.1.6	Percentage Breakdown of the Energy Consumed During Sizing	16
PART 2.2	ENERGY CONSERVATION DURING SIZING OPERATION	17
2.2.1	Introduction	17
2.2.2	New Innovations for Energy Saving in Sizing	17
2.2.2.1	High pressure sizing	18
2.2.2.2	Foam sizing	18
2.2.2.3	Solvent sizing	21
2.2.2.4	Hot melt sizing	23
2.2.2.5	Recycling of heat energy	25
2.2.2.6	Tangential sizing	27
2.2.3	Some Other Recent Developments in Sizing to Reduce Cost and Improve Quality	29

2.2.3.1	Size reclamation	29
2.2.3.2	Single end sizing	31
2.2.3.3	Draw sizing	33
2.2.3.4	Permanent sizing	33
2.2.3.5	Mechanical yarn compaction	33
2.2.3.6	Use of spin finish	33
2.2.3.7	The Cutts methods	34
2.2.3.8	Nip sizing	35
2.2.3.9	Computer control slashing	36
PART 2.3	FACTORS AFFECTING ENERGY CONSUMPTION IN SIZING	37
2.3.1	Machine Speed	37
2.3.2	Squeeze Pressure	38
2.3.3	Drying System	38
2.3.4	Size Material	42
2.3.5	Other Machine Variables	45
2.3.6	Automation	46
PART 2.4	REVIEW OF QUALITY AND PERFORMANCE OF THE SIZED YARN	47
2.4.1	Introduction	47
2.4.2	Factors Affecting the Quality and Performance of the Size Yarn	50
2.4.2.1	Size material	50
2.4.2.2	Yarn quality and fibre blend	55
2.4.2.3	Effect of conditions of warp preparatory	68
PART 2.5	WEAVABILITY	74
2.5.1	Introduction	74

2.5.2	Evaluation of Weavability	78
2.5.3	Instruments Used to Measure Weavability	83
PART 2.6	A REVIEW ON THE YARN ABRASION AND BREAKAGE IN WEAVING	88
2.6.1	Introduction	88
2.6.2	Abrasion Mechanism and Yarn Break	88
	2.6.2.1 Abrasion of an unsized yarn	90
	2.6.2.2 Abrasion of sized yarn	90
	2.6.2.3 Yarn breakage	92
PART 2.7	REVIEW OF HIGH PRESSURE SQUEEZE IN SIZING	93
CHAPTER 3	EXPERIMENTAL	100
PART 3.1	PLAN OF WORK	100
PART 3.2	MATERIALS	101
3.2.1	Yarn	101
3.2.2	Size Materials	102
PART 3.3	SIZING	102
3.3.1	Machine	102
3.3.2	Preparation	102
CHAPTER 4	RESULTS AND DISCUSSION	105
PART 4.1	EFFECT OF PROCESS VARIABLES ON WATER EVAPORATION REQUIREMENT AND ENERGY SAVING IN HIGH PRESSURE SQUEEZING	105
4.1.1	Introduction	105
4.1.2	Experimental	107
	4.1.2.1 Yarn compression test	107
	4.1.2.2 Sizing	108

	4.1.2.3	Evaluation of add-on and wet pick-up expression	108
	4.1.2.4	Energy measurements	108
	4.1.3	Optimization of Squeeze Pressure	110
	4.1.4	Effect of Process Variables on Water Evaporation Requirements	111
	4.1.5	Relative Effectiveness of Process Variables Affecting Water Evaporation Requirement	115
	4.1.6	Energy Saving Due to High Pressure Squeezing	117
	4.1.6.1	Thermal energy	117
	4.1.6.2	Electrical energy	117
PART 4.2		MECHANISM OF WATER EXTRACTION IN YARN BY HIGH PRESSURE SQUEEZING	119
	4.2.1	Introduction	119
	4.2.2	Experimental	120
	4.2.2.1	Sizing	120
	4.2.2.2	Sizing with water	120
	4.2.2.3	Determination of water imbibition of yarns	120
	4.2.3	Mechanism of water Extraction	121
PART 4.3		EFFECT OF SQUEEZE PRESSURE ON THE MECHANICAL PROPERTIES OF YARN	125
	4.3.1	Introduction	125
	4.3.2	Testing Procedures and Instruments	125
	4.3.2.1	Tensile Testing of Yarn	126
	4.3.2.2	Hairiness	126
	4.3.2.3	Bending rigidity	126
	4.3.2.4	Sonic modulus	127

4.3.3	Results and Discussion	128
4.3.3.1	Tensile properties	128
4.3.3.2	Hairiness	131
4.3.3.3	Bending rigidity	133
4.3.3.4	Sonic pulse propagation	134
PART 4	EFFECT OF SQUEEZE PRESSURE ON YARN/ FIBRE DAMAGE	135
4.4.1	Introduction	135
4.4.2	Experimental	136
4.4.2.1	Sizing with hot water	136
4.4.2.2	Tensile testing of fibres	136
4.4.2.3	Weavability of hot water treated yarn	136
4.4.2.4	Nip width determination	136
4.4.2.5	Surface damage examination by SEM	137
4.4.3	Results and Discussion	137
4.4.3.1	Effect of squeeze pressure on nip width	137
4.4.3.2	Effect of squeeze pressure on properties and performance of the hot water treated yarn	138
4.4.3.3	Effect of squeeze pressure on the tensile properties of the fibres of the water treated yarns	139
4.4.3.4	Surface damage examination.	141
PART 4.5	EFFECT OF SQUEEZE PRESSURE ON YARN STRUCTURE	142
4.5.1	Introduction	142
4.5.2	Experimental	143
4.5.2.1	Study of internal structure of the yarn	143

4.5.2.2	Cross-section preparation	144
4.5.2.3	Photography on projectina	144
4.5.2.4	Analysis of cross-sections on the image analyser	144
4.5.3	Results and Discussion	145
4.5.3.1	Yarn circularity	146
4.5.3.2	Size film thickness and penetration	148
4.5.3.3	Packing density	150
4.5.3.4	Yarn diameter	152
PART 4.6	EFFECT OF SQUEEZE PRESSURE ON THE WEAVING PERFORMANCE OF SIZED YARN	153
4.6.1	Introduction	153
4.6.2	Experimental	154
4.6.2.1	Weaving abrasion resistance/ weavability of yarns	154
4.6.2.2	Yarn damage during abrasion	155
4.6.3	Results and Discussion	156
4.6.3.1	Abrasion behaviour of size yarns	156
4.6.3.2	Variability of abrasion cycles for high pressure sized yarn	157
4.6.3.3	Yarn elongation during abrasion	158
4.6.3.4	Effect of square pressure on weaving abrasion resistance	159
4.6.3.5	Weaving abrasion resistance as a function of size add-on	162
4.6.4.6	Nature of yarn breakage	164
PART 4.7	PERFORMANCE OF COARSE YARNS IN HIGH PRESSURE SQUEEZING	166
4.7.1	Introduction	166
4.7.2	Experimental	166

4.7.2.1	Yarns	166
4.7.2.2	Sizing	167
4.7.2.3	Thermal energy measurement	167
4.7.2.4	Tensile testing ¹	167
4.7.2.5	Weaving abrasion test	168
4.7.3	Results and Discussion	168
4.7.3.1	Thermal energy saving	168
4.7.3.2	Properties and performance of the coarse yarns	169
PART 4.8	RELATIVE ROLE OF SIZE RECIPE VIS-A-VIS HIGH SQUEEZE PRESSURE IN IMPROVING THE PERFORMANCE OF THE SIZED YARN	174
4.8.1	Introduction	174
4.8.2	Testing	175
4.8.2.1	Sizing	175
4.8.2.2	Tensile testing	176
4.8.2.3	Weavability test	176
4.8.3	Results and Discussion	176
4.8.3.1	Tensile properties	176
4.8.3.2	Weaving performance	177
PART 4.9	INDUSTRIAL TRIAL	180
4.9.1	Introduction	180
4.9.2	Experimental	181
4.9.3	Results and Discussion	182
4.9.3.1	Thermal energy	182
4.9.3.2	Electrical energy	184
4.9.3.3	Tensile properties	184

	4.9.3.4	Effect of squeeze pressure on warp breakage on the loom	185
