C E R T I F I C A T E

This is to certify that this Thesis "Complete Laminar Film Condensation of Pure and Binary Vapors On A Vertical Non-Isothermal Surface" being submitted by Mr. Y. V. S. R. Sastry to the Indian Institute of Technology, Delhi, for the award of the degree of Doctor of Philosophy in Mechanical Engineering, is a record of bonafide research work carried out by him under our supervision and guidance for the last three years, and to our knowledge, it has reached the standard fulfilling the requirements of the regulations relating to the degree.

The results contained in this work have not been submitted in part or in full, to any other University or Institute for the award of any degree or Diploma.

*P. L. Ballaney*

(PROF. P. L. BALLANEY)  
Supervisor & Head,  
Mechanical Engineering  
Department,  
Delhi College of Engineering,  
Kashmere Gate, Delhi-110006.

*C. P. Arora*

(PROF. C. P. ARORA)  
Supervisor & Head,  
Mechanical Engineering  
Department,  
Indian Institute of  
Technology,  
Hauz Khas, New Delhi-110029.

### ACKNOWLEDGEMENTS

The author is deeply indebted to Prof. C. P. Arora for his guidance and valuable suggestions at every stage of this work. Prof. P. L. Ballaney has been a constant source of inspiration and the encouragement and guidance the author received from him is gratefully acknowledged.

Thanks are due to the Delhi University Computer Centre for providing excellent facilities on System 360/44. The friendly staff of the Centre, not only provided faster runs for the jobs but also helped in the programme development.

The author wishes to thank the drawing section of Mechanical Department of Delhi College of Engineering specifically Mr. V. K. Chopra, Mr. P. C. Malik and Mr. S. M. Bhatia for the tracings and prints. Thanks are also due to Mr. M. P. Mathur for excellent typing.

	NOMENCLATURE	iii
CHAPTER 1	INTRODUCTION	1 - 6
1.1.	Non-Isothermal Refrigeration	1
1.2.	Condensation of Vapor Mixtures	3
1.3	Statement of the Problem	4
CHAPTER 2	LITERATURE SURVEY - CONDENSATION OF PURE VAPORS	7 - 19
2.1	Introduction	7
2.2	Nusselt's Model	7
2.3	Experimental Correlations	10
2.4	Correction Factors	12
2.5	Boundary Layer Analysis	13
2.6	Concluding Remarks	17
CHAPTER 3	LITERATURE SURVEY - CONDENSATION OF VAPOR MIXTURES	20-28
3.1	Condensation Models	20
3.2	Review of Theoretical Works	25
3.3	Review of Experimental Works	27
3.4	Concluding Remarks	28
CHAPTER 4	CONDENSATION OF PURE VAPORS	29-54
4.1	Condensation Model and Analysis	29
4.2	Coolant Temperature Variation	33
4.3	Wall Temperature Variation	34
4.4	Variable Properties	35
4.5	Computations	37
4.6	Reference Temperature Parameter	38
4.7	Comparison With Experimental Results	41
4.8	Analysis of Coolant Flow Model	45
4.9	Condensation of Ammonia Vapors	49
4.10	Negligible Coolant Resistance	51

(ii)

CHAPTER 5	CONDENSATION OF VAPOR MIXTURES	55-77
5.1	Choice of Condensation Models	55
5.2	Unified Methodology	56
5.3	Equilibrium Condensation Model	57
5.4	Non-Equilibrium Condensation Model	60
5.5	Computational Procedure	62
5.6	Analysis of Equilibrium Condensation	64
5.7	Analysis of Non-equilibrium Condensation Model	73
CHAPTER 6	CONCLUSIONS AND COMMENTS	78-84
6.1	Conclusions	78
6.2	Comments	82
TABLES		85-92
APPENDIX A	Thermodynamic Properties	93
APPENDIX B	Density	94
APPENDIX C	Thermal Conductivity	95
APPENDIX D	Viscosity	95
APPENDIX E	Coolant Film Resistance	96
	Logic of Computer Programmes	98
APPENDIX F		100
APPENDIX G		101
APPENDIX H		103
APPENDIX I		107
	REFERENCES	109-115
