

SOME INVESTIGATIONS OF FRAUNHOFER DIFFRACTION  
IN PARTIALLY COHERENT LIGHT  
(Performance of optical systems in partially coherent light)

BEJ NATH GUPTA

Thesis submitted to Indian Institute of Technology, Delhi  
for partial fulfilment of the Degree of  
Doctor of Philosophy

1972

## ACKNOWLEDGMENTS

I wish to express my deep sense of gratitude to Professor P.K. Katti for suggesting the problem and valuable guidance. My sincere thanks are also due to Mr. K. Singh without whose help this work could have not been possible in the present form.

I also wish to express my sincere thanks to Professor M.S. Sodha, Professor C.L. Mehta and Professor K.L. Chopra for their encouragement and help. The author is also grateful to his colleagues in the Applied Optics group whose suggestions have greatly improved the contents of the thesis. I am thankful to the staff of the Computer Centre, I.I.T. Delhi for their help in the computational work for the present thesis. Thanks are also due to Mr. T.N. Gupta for the efficient typing of the manuscript.

The work was carried out under the financial support of the Council of Scientific and Industrial Research, India.

Bej Nath Gupta

## CONTENTS

Chapter	Page
ACKNOWLEDGMENTS	
PREFACE	1
I. BRIEF REVIEW OF THE THEORY OF PARTIAL COHERENCE AND ITS APPLICATIONS	1
1. Introduction	1
2. Basic parameters in the treatment of partially coherent light	2
3. Review of previous investigations using partially coherent light	11
II. PARTIALLY SPACE COHERENT DIFFRACTION BY OPTICAL SYSTEMS WITH AMPLITUDE FILTERS	20
1. Introduction	20
2. Theory	22
3. Results and Discussion	28
1. Circular Aperture	28
11. Slit	36
4. Concluding remarks	48
III. PARTIALLY SPACE COHERENT DIFFRACTION BY AN IMPERFECT OPTICAL SYSTEM AND IMPROVEMENTS IN ITS PERFORMANCE USING AMPLITUDE FILTERS	49
1. Introduction	49
2. Intensity distribution by an optical system with defocused slit	52
3. Partially space coherent diffraction by optical systems suffering from defect of focus and spherical aberration and having uniform and non-uniform illumination over the circular and annular apertures	57
4. Concluding remarks	66

<b>IV.</b>	<b>EFFECT OF TURBULENCE ON THE PERFORMANCE OF AN OPTICAL SYSTEM WITH ANGULAR APERTURES</b>	<b>69</b>
	1. Introduction	69
	2. Theory	71
	3. Results and discussion	76
	4. Concluding remarks	78
<b>V.</b>	<b>DETECTION, RESOLUTION AND PARAMETER ESTIMATION OF STATIC OPTICAL SIGNALS BY OPTICAL SYSTEMS</b>	<b>79</b>
	1. Introduction	79
	2. Theory	82
	3. Discussion of results	88
	<b>APPENDIX 'A'</b>	<b>93</b>
	<b>REFERENCES</b>	<b>98</b>
	<b>REPRINTS</b>
