

HIGH FIELD TRANSPORT AND TUNNELING PHENOMENA  
IN SEMICONDUCTORS AND METALS

Prabhat Kumar Dubey

Thesis submitted to Indian Institute of Technology, Delhi  
for partial fulfilment of the degree of  
Doctor of Philosophy

1970

### ACKNOWLEDGEMENTS

I wish to express my deep sense of gratitude to my esteemed guide and supervisor, Prof. M.S. Sodha, for his invaluable help, kind encouragement and constructive suggestions at various stages without which the present work would not have been possible.

I am indebted to Dr. S.K. Sharma, now at University of Alberta, Edmonton, for his help and keen interest in this work. I am specially thankful to Mr. A.K. Chakravarti for fruitful discussions. It is my duty to acknowledge the friendly encouragement rendered by my colleagues and friends. Thanks are also due to Mr. S.L. Anuja for an efficient typing of the thesis.

This work was financially supported by the Council of Scientific and Industrial Research (India).

Prabhat Kumar Dubey

## CONTENTS

	Preface	..	1
Chapter			
I	NONLINEAR MIXING OF ELECTROMAGNETIC WAVES IN DEGENERATE SEMICONDUCTORS WITH NONPARABOLIC ENERGY BANDS	..	1
	1.1 Introduction	..	1
	1.2 Mixed Frequency Components in the Current Density	..	6
	1.3 Mixed Frequency Components in the Transmitted Wave from a Semi-conducting Slab	..	18
	1.4 Numerical Results and Comparison with Experiment	..	24
	1.5 Optimum Conditions	..	28
	1.6 Discussion	..	30
	1.7 Remarks	..	34
II	HOT-ELECTRON FARADAY EFFECT IN NONPARABOLIC SEMICONDUCTORS AT HIGH AND LOW TEMPERATURES	..	37
	2.1 Introduction	..	37
	2.2A Distribution Function of Carriers	..	41
	2.3A Faraday Rotation and Ellipticity	..	52
	2.4A Numerical Results and Discussion	..	55
	2.2B Solution of Boltzmann Equation for Inelastic Scattering by Optical Phonons	..	58
	2.3B Discussion	..	68

III	ELECTRIC-FIELD-INDUCED ANISOTROPY OF MICROWAVE CONDUCTIVITY IN NONPARA- BOLIC SEMICONDUCTORS AT HIGH AND LOW TEMPERATURES	..	76
	3.1 Introduction	..	76
	3.2A Components of Distribution Function of Carriers	..	79
	3.3A Parallel and Perpendicular Microwave Conductivities	..	87
	3.4A Numerical Results and Discussion	..	90
	3.2B Parallel and Perpendicular Microwave Conductivities	..	92
	3.3B Discussion	..	97
	3.5 Conclusions	..	99
IV	HIGH FIELD TRANSPORT PHENOMENA IN DEGENERATE AND NONDEGENERATE SAMPLES OF n-InSb AT HIGH TEMPERATURES	..	103
	4.1 Introduction	..	103
	4.2A Electron Temperature	..	108
	4.3A Expressions for the Transport Coefficients	..	113
	4.4A Numerical Results and Discussion	..	116
	4.2B Distribution Function	..	118
	4.3B Discussion	..	119
	4.5 Limitations and Approximations	..	122
V	GALVANO AND THERMO-MAGNETIC TRANSPORT COEFFICIENTS IN n-InSb AT LOW TEMPERATURES	..	127
	5.1 Introduction	..	127
	5.2 Expressions for G <sub>TMTC</sub>	..	129
	5.3 Numerical Results and Discussion	..	133

	5.4	Comparison with Experimental Results ..	134
	5.5	Conclusions ..	138
VI		FIELD EMISSION OF ELECTRONS FROM NON- PLANAR METAL SURFACES ..	141
	6.1	Introduction ..	141
	6.2A	Potential Barrier ..	143
	6.3A	Transmission Coefficient of Electrons. ..	144
	6.4A	Electron Emission ..	148
	6.5A	Electron Emission from Plane Surfaces ..	149
	6.6A	Discussion and Numerical Results ..	150
	6.2B	Potential Barrier ..	154
	6.3B	Transmission Coefficient of Electrons ..	156
	6.4B	Complete Electron Emission ..	159
	6.5B	Emission from Plane Surface ..	160
	6.6B	Numerical Results and Discussion ..	161
VII		DEPENDENCE OF FERMI ENERGY ON SIZE ..	166
	7.1	Introduction ..	166
	7.2	Thin Metallic Film ..	168
	7.3	Spherical Metallic Particle ..	173
	7.4	Application to Thermionic Emission ..	174
	7.5	Discussion ..	175

VIII	TUNNEL EFFECT IN METAL-INSULATOR-METAL JUNCTIONS	..	181
	8.1 Introduction	..	181
	8.2 Shape of the Potential Barrier	..	185
	8.3 Calculation of the Tunnel Current	..	189
	8.4 Comparison with Experimental Results	..	197
	8.5 Comparison of the Logarithmic- Derivative Curves	..	203
	8.6 Discussion	..	206
