

PREPARATION AND PROPERTIES OF ORGANOSILICON  
MONOMERS AND POLYMERS

A thesis submitted to the  
INDIAN INSTITUTE OF TECHNOLOGY, DELHI  
for the degree of  
DOCTOR OF PHILOSOPHY

GADDAN MANA BABU,  
M.Sc.,

Department of Chemistry

April, 1976

C E R T I F I C A T E

This is to certify that the thesis entitled "Preparation and Properties of Organosilicon Monomers and Polymers", being submitted by Mr. Gaddam Nana Babu to the Indian Institute of Technology, Delhi, for the award of the Degree of Doctor of Philosophy in Chemistry, is a record of bonafide research work carried out by him. Mr. Gaddam Nana Babu has worked under my guidance and supervision and has fulfilled the requirements for the submission of the thesis.

The results contained in this thesis have not been submitted, in part or in full, to any other university or institute for the award of any degree or diploma.

(R. D. Dua)

Head, Chemistry Department,  
Indian Institute of Technology, Delhi  
Hauz Khas, New Delhi-29 (India)

(P. Bajaj)  
Thesis Supervisor

TO

MY BELOVED PARENTS

### ACKNOWLEDGEMENTS

The author wishes to express on record his deep sense of gratitude to Dr. (Miss) P. Bajaj, Assistant Professor, Department of Textile Technology, Indian Institute of Technology, Delhi for her keen interest, painstaking guidance, constant encouragement and constructive suggestions at various stages without which the present work would not have been possible.

I take this opportunity to thank Professor R.D. Dua, Head of the Chemistry Department, not only for providing laboratory facilities but also for his allout help whenever required.

I am indebted to Professor D.S. Varma, Head of the Department of Textile Technology, for the help rendered at various stages of this work.

Thanks are due to Professor G.B. Singh, Vice-Chancellor, Central University, Hyderabad, for nuclear magnetic resonance spectra of some of the silicon monomers from Banaras Hindu University. The author is grateful to the then Head of the Chemistry Department, University of Rajasthan, Jaipur for molecular weight measurements of some of the silicon monomers.

I am also indebted to Dr. (Mrs.) I.K. Varma of the Chemistry Department, Dr. A.K. Mukherjee and Dr. B.L. Deopura of the Textile Technology Department for many valuable suggestions.

My sincere thanks go to Mr. B.C. Venkat Reddy, Mr. P. Sudhakar, Mr. S.F. Xavioir, Mr. H.M. Hussain and Mr. B. Venkateswara Rao for their constant encouragement.

My special thanks are due to Mr. D.C. Gupta and Mr. Vijaya Kumar for the help rendered in preparing this thesis.

The financial support from the Council of Scientific and Industrial Research, New Delhi, is gratefully acknowledged.

I acknowledge with thanks for the encouragement from elders, relatives and my wife for her consolations which I required quite often.

Last but not the least, my thanks are due to Mr. S.L. Anuja for expert execution of the typing work, Mr. K.G. Padam for tracing the figures and Mr. Bala Datt for running IR spectra of the compounds.

*G. Nana Babu*

(Gaddam Nana Babu)
