### ACKNOWLEDGEMENTS

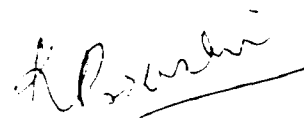

It is my great pleasure and privilege to express profound indebtedness to Dr. R.C. Maheshwari, my guide and mentor, for his valuable guidance, constructive criticism, stimulating discussions and constant inspiration offered at each and every stage of this work, as a consequence of which the present study reached fruition. I place on record my sincere thanks to him. I am equally thankful to the Co-supervisor Dr. O.P. Vimal, Director, Department of Non-conventional Energy Sources, New Delhi, for his valuable suggestions, advice and discussions during the entire period of study. To me instead of being formal and official, he has always been informal, cordial and homely.

It is my privilege to have Prof. (Mrs) P. Vasudevan as Head of the Department, who in her capacity extended all possible help. I am highly indebted for her assistance and her keen interest in my work. I wish to put on record my cordial thanks to Prof. S.V. Patwardhan, the former Head, centre for R.D & A.T for providing necessary facilities for the execution of present work and valuable advice. I deeply acknowledge the constant encouragement and help of Dr. Jagpal Singh, Senior Scientific Officer, centre for R.D & A.T, which was a big moral support to me during this work.

I am also grateful to Indian Council of Agricultural Research, New Delhi for providing fellowship through out the course of study.

Sincere thanks are also due to Prof. (Mrs) Poornima Mathur, Department of Humanities and Social Sciences, and Prof. H.B. Mathur, Department of Mech. Engineering for *their* help and co-operation. Due interest shown and co-operation extended by faculty member Mrs. Dilbagh Kaur, Mr. V.P.S. Sorayan, and Dr. Mira Madan is thankfully acknowledged. The devotion and team spirit of my friends Messers S.K. Jain, Y.N. Prasad, S.N. Naik and J.P. Sharma in helping me, was a source of encouragement and strength without it could have been really difficult to cope up with the work.

I feel to record my deepest regards to my parents and family members with whose blessings and continuous support I could be able to achieve this object. Lastly, I would like to thank all the residents of Mohmedpur village for helping whole-heartedly in data collection.

( KASALANATI PRABHAKAR )

C E R T I F I C A T E

This is to certify that the thesis entitled, "STUDIES ON PRODUCTION AND UTILIZATION OF CHARCOAL FOR RURAL APPLICATIONS", submitted by Mr. Kasalanati Prabhakar has been prepared under our supervision in conformity with the rules and regulations of Indian Institute of Technology, Delhi. The research report and results presented in this thesis have not been submitted for any degree in any other University/Institute.

*O.P. Vimal*

Dr. O.P. Vimal  
Director,  
Deptt. of Non-Conventional  
Energy Sources (DNES),  
Block No. XIV,  
C.G.O. Complex, Lodi Road,  
New Delhi - 110 003.

*R.C. Maheshwari*

Dr. R.C. Maheshwari  
Assistant Professor,  
Centre for Rural Development  
& Appropriate Technology,  
Indian Institute of Technology,  
Hauz Khas,  
New Delhi - 110 016.
